2001::

A SPACE ODYSSEY

2001: Introduction

Looking for ANY references in art and culture that reflected my project I/O theme it was actually difficult to find many reference points. I think because of the vast nature of the theme and the time scales involved maybe artist and creative people usually choose a part of the story to focus on rather than all of human history, his art and use of technology it is simpler and maybe more practical to concentrate on individual elements.

PIC 1: the standard web searches generally return the legendary evolution of man image.

PIC 2: evolving phone
PIC 3: evolving astronaut

**STUDY AND ANALYSIS:
STANLEY KUBRICK'S
2001: SPACE ODYSSEY
[1968]**

ALWAYS WORK LIKE

STANLEY KUBBRICK

IS WATCHING YOU

A PUBLIC SERVICE ANNOUNCEMENT

"Since an encounter with an advanced interstellar intelligence would be incomprehensible within our present earthbound frames of reference, reactions to it will have elements of philosophy and metaphysics that have nothing to do with the bare plot outline itself."

-Stanley Kubrick, Joseph Gelmis interview 1970

Stanley Kubrick's 2001: A Space Odyssey is widely regarded as one of the most influential and culturally significant films of the twentieth century.

2001 A SPACE ODESSEY was released in 1968, it occupies a unique position between art, science, and philosophy, blending groundbreaking cinematography with profound questions about humanity's origins and future.

Working alongside science-fiction author Arthur C. Clarke, Kubrick created not just a narrative film but an immersive visual and conceptual experience that challenged and redefined what cinema could be. Its precise visual language, absence of dialogue, and innovative special effects made it feel decades ahead of its time.

Today, it continues to inspire artists, designers, and filmmakers exploring ideas around technology, consciousness, and human evolution.

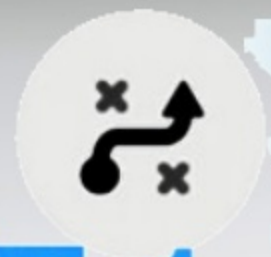

KEY ELEMENT 3

Cinematography

The technical process of capturing moving images

The placement of actors and scenery on a stage for a theatrical, film or television production.

KEY ELEMENT 1

Mise en scène

The arrangement of physical elements within a scene

KEY ELEMENT 5

Sound

The use of audio elements

KEY ELEMENT 2

Performance

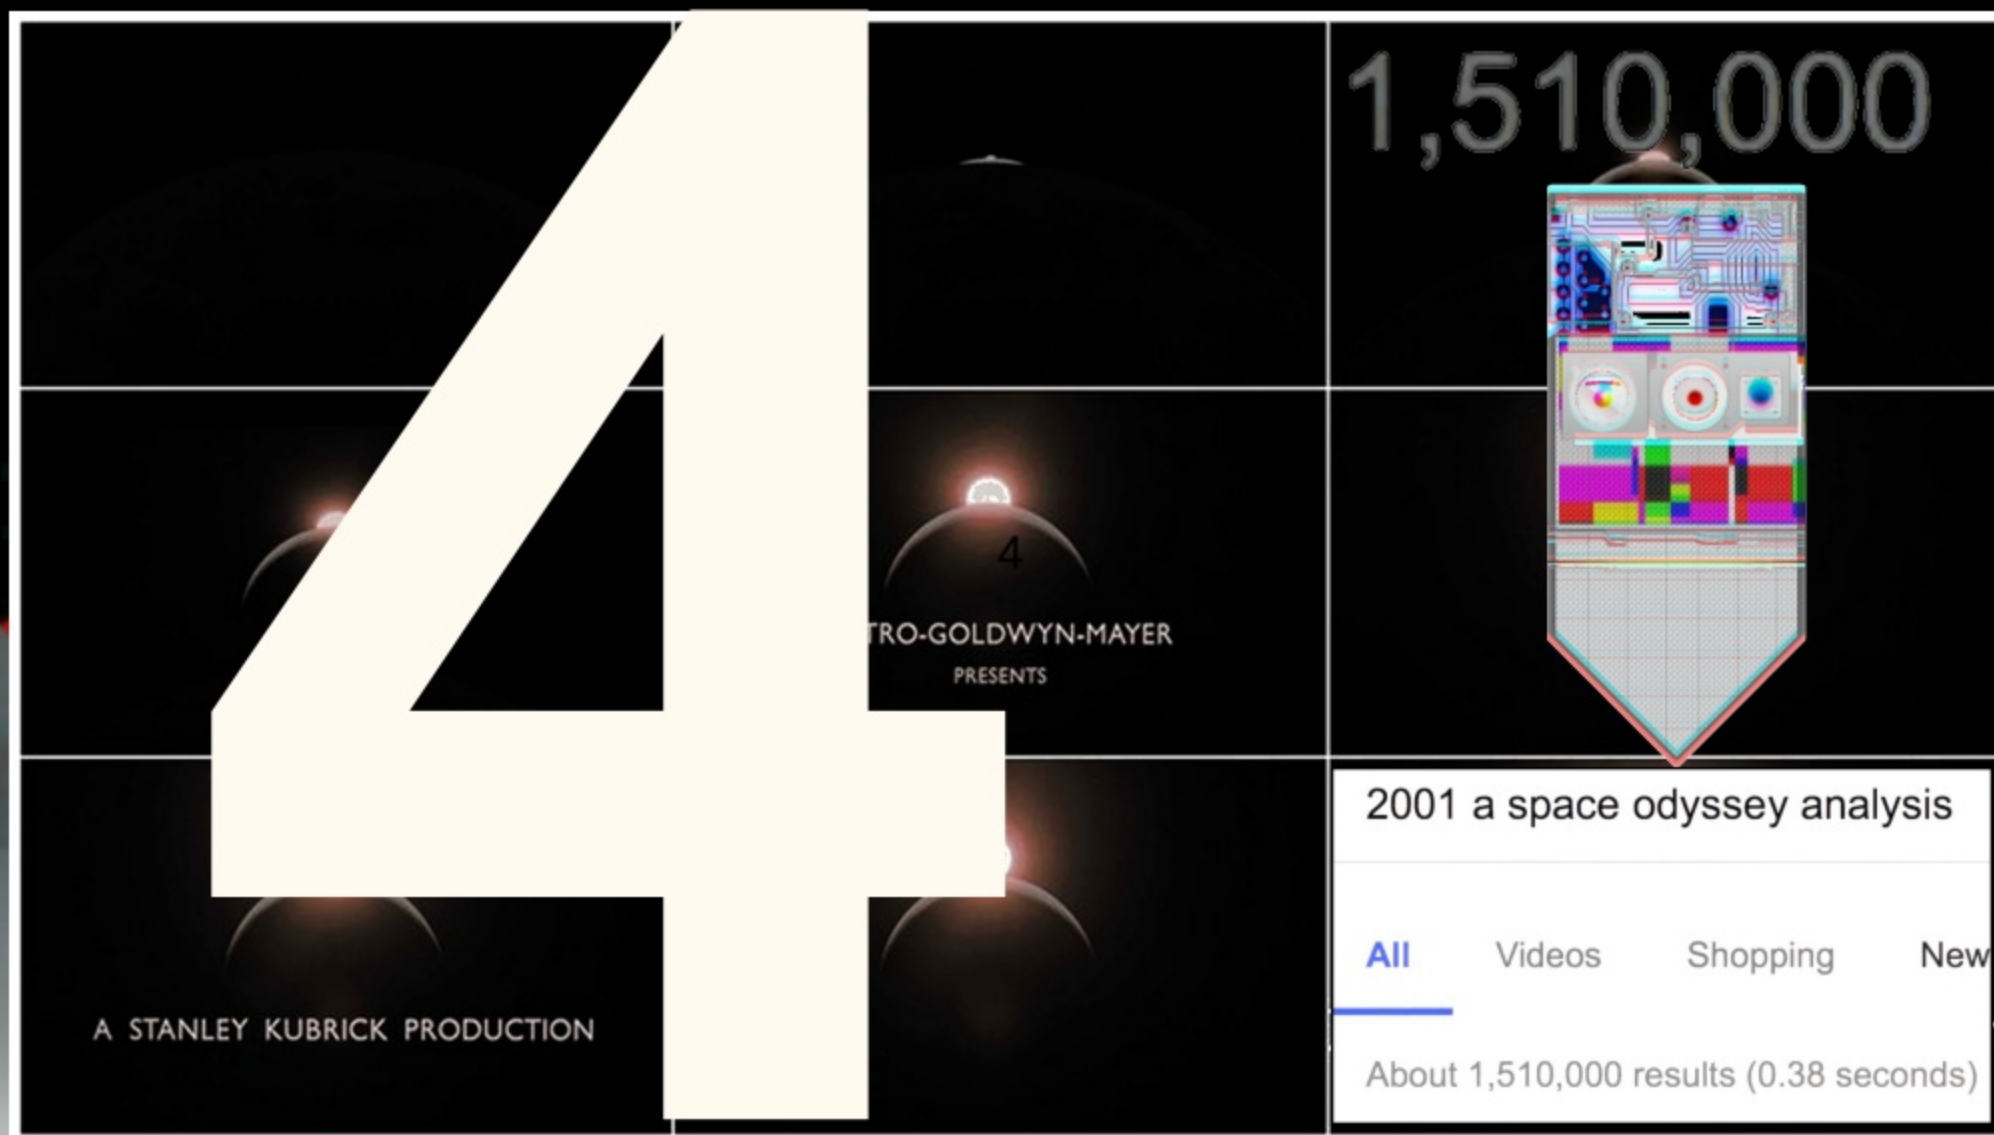

The delivery verbal and non verbal information by actors

KEY ELEMENT 4

Editing

The assembly of film footage to create a coherent sequence

"FOUR MINUTES OF BLACK SCREEN = 1.5 MILLION DIFFERENT MEANINGS"

2001 a space odyssey analysis

About 1,510,000 results (0.38 seconds)

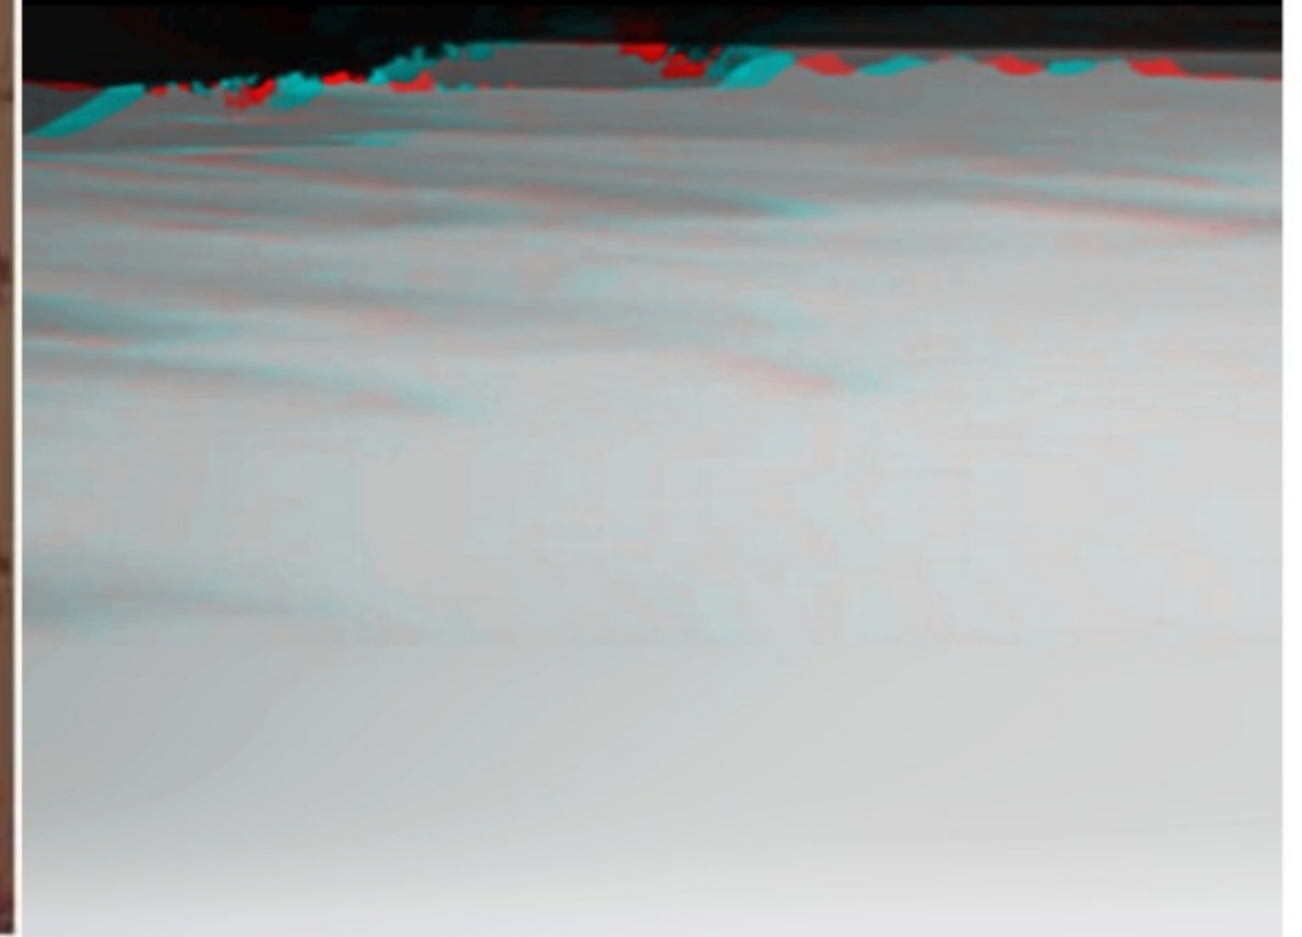

CHAPTER ONE: The Dawn Of Man

The Dawn of Man In prehistoric Africa, a tribe of starving early humans discover a black monolith. The object influences them to use animal bones as tools and weapons, allowing them to hunt for meat and defeat a rival tribe for control of a watering hole. A triumphant ape-man throws a bone into the air, which jump-cuts to an orbiting nuclear weapons satellite in the future, symbolising the continuity of human aggression.

THE MOST FAMOUS FILM CUT IN HISTORY

The Dawn of Man
sequence ends with the
bone tool transitioning
to a nuclear rocket of
the future symbolising
humans evolutionary
progress

At the point the film still
has no dialogue. It feels
more like a
documentary

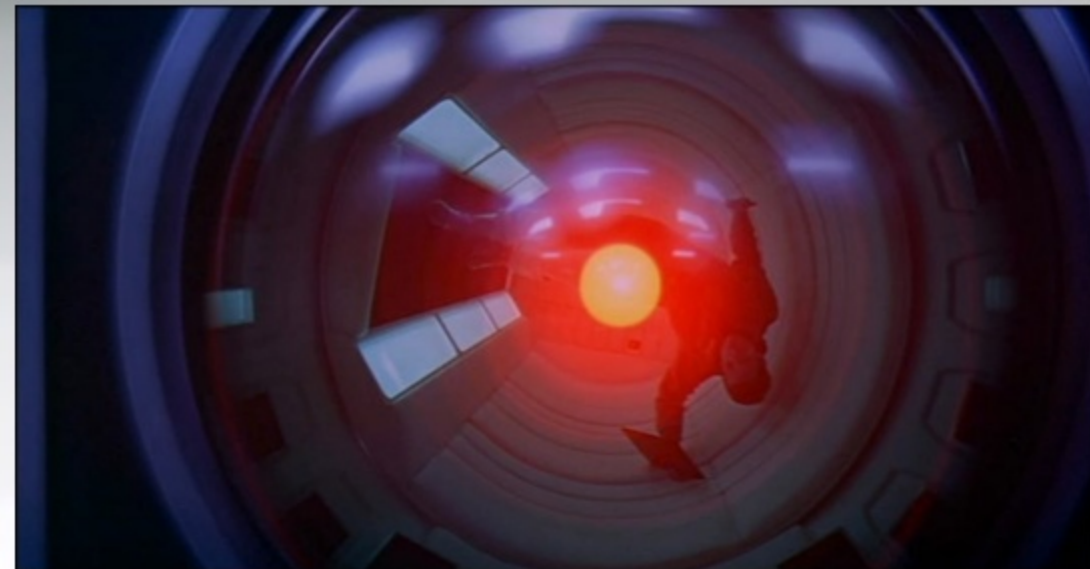

CHAPTER TWO: MOON MYSTERY

THE SECOND SECTION OF THE FILM FOLLOWS A SCIENTIST TO A MOON BASE WHERE A MYSTERIOUS BLACK MONOLITH HAS BEEN DISCOVERED. IT'S BEEN THERE 40 MILLION YEARS.

AS THE SCIENTIST TOUCHES THE OBJECT A SIREN LIKE SOUND BLASTS OUT.

THIS SECTION ALSO HAS LOTS OF CAMERA TRICKS AROUND GRAVITY AND ROTATION

CHAPTER THREE: HAL 9000

Part 3 is the artificial intelligence sabotaging and killing Frank. Dave shuts the machine down in a sad slow death of Hal.

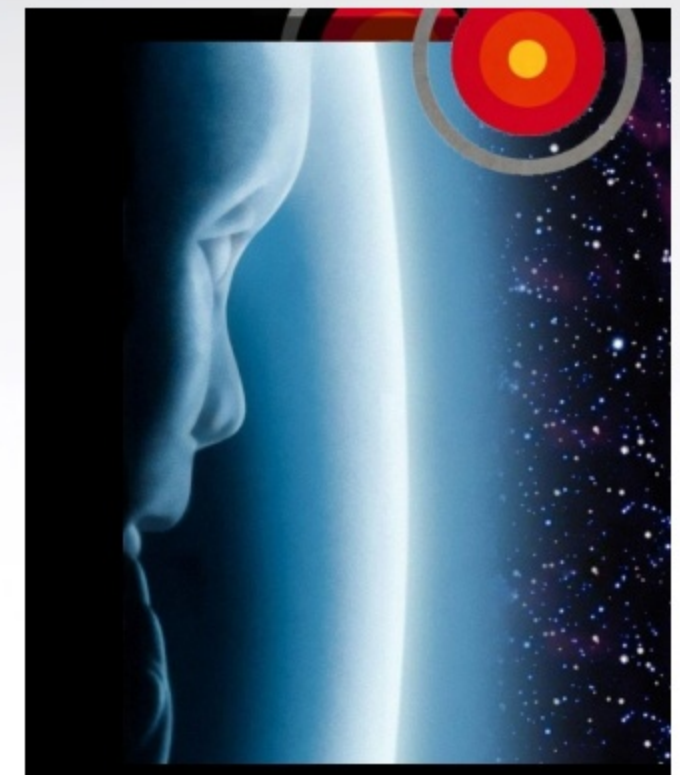

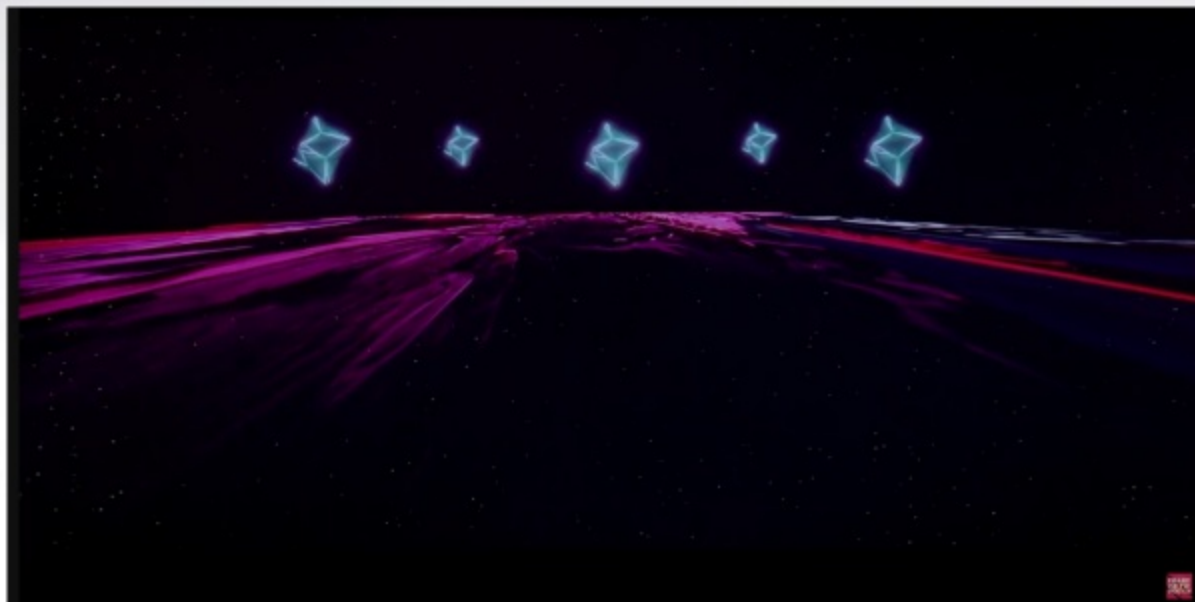

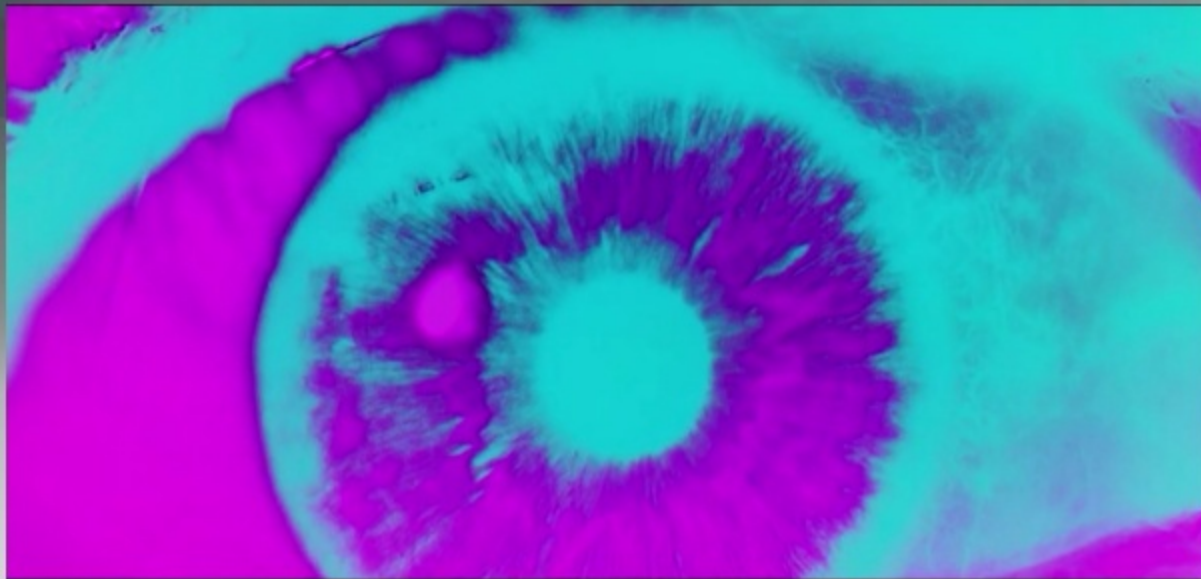

Its really the only emotional scene throughout the film and is from a computer

CHAPTER FOUR: STARGATE

Part 4 is where most people
start to disagree on meaning.

I think this is Dave being taken
to a safe place before his
eventual
transformation...discuss!

2001 AI vs I/O Challenge

I challenged my AI assistant to generate posters that represent the themes in 2001.
