

I/O T-shirt Design Study 2001 Space Odyssey Themed Design

I set myself a task of creating a unique and personalised t-shirt for my older brothers birthday. Using a library of 2001 film imagery & quotes I wanted to create a design that didn't automatically look like a film themed t-shirt as usually these can look a bit rubbish. I also wanted it to contain lots of hidden details within the design so the image could also be used as a puzzle for my brother to unlock secret details. I integrated images of my brother when he was a baby into the design so it was personal to him and completely unique.

Initial elements I wanted to include for design were:
Dawn of Man scene
Chess board – puzzles & games
Hal 9000 – AI
Baby images without causing embarrassment.

I also wanted this exercise to try and evaluate an open source illustrating design suite by Libre Office

Dawn Of man images I tried during development

I didn't want the ape man image to be too obvious within design and I found the "cartoon" style to not really fit with a sci fi theme

I liked the profile view below and it sort of created a negative space area

font from French poster design

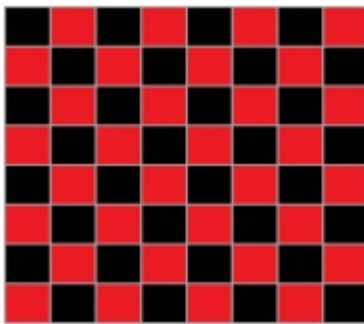

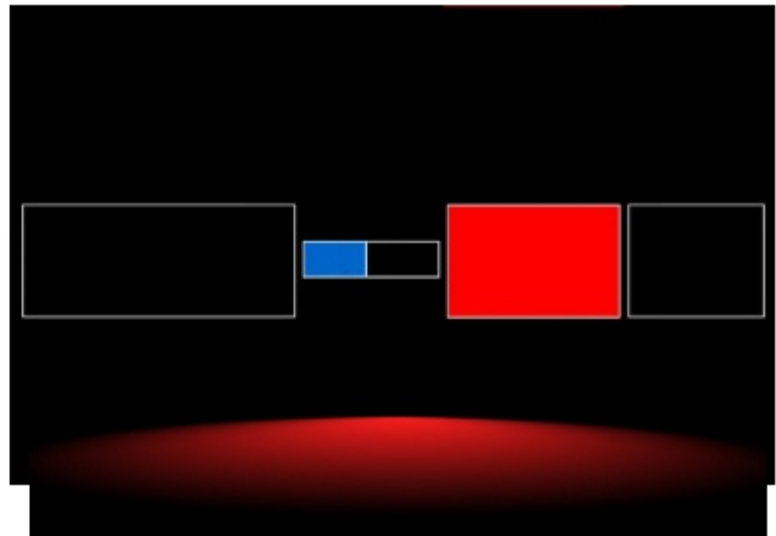

After looking at multiply font styles from historical film posters I liked the Data 70 free downloadable font used on a french release of the film detailed on left

I STARTED TO TRY AND MAKE A CHESS BOARD
MADE FROM DIFFERENT ELEMENTS IN THE FILM.

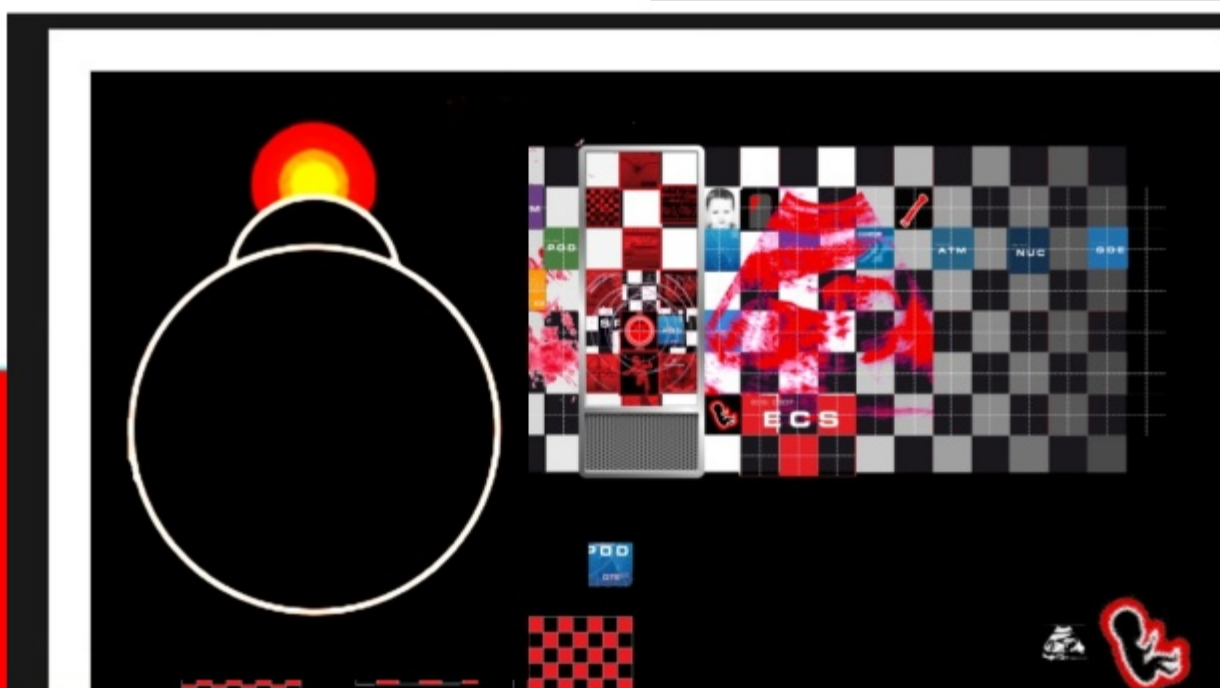

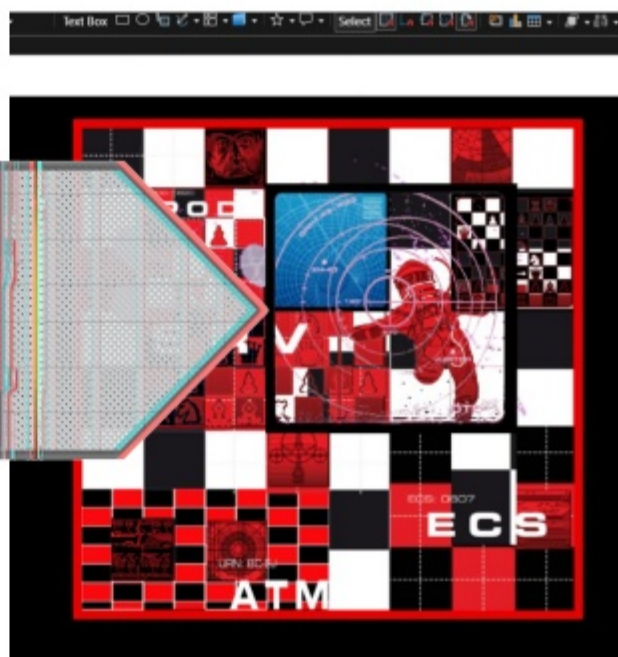

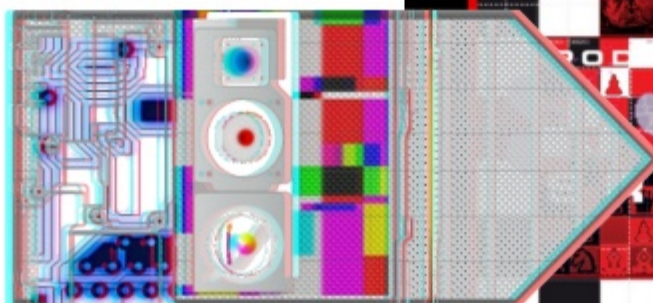

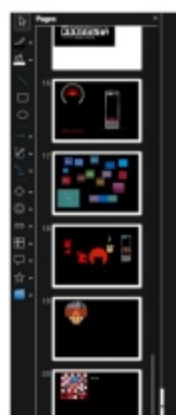

THE HAL ELEMENT ALSO NEEDED TO BE A KEY
PART OF THE DESIGN AND I STARTED LOOKING AT
REPLACING THE HAL NAME
