TECHNOLOGY WILL **RESHAPE** THIS
AGAIN.

“Architecture is the greatest
of all the arts, for it
embraces all the others.”

michelangelo

Architecture organises us physically. Often,
when people claim architecture is “more
important,” what they really mean is:

- IT AFFECTS MORE PEOPLE
- IT COSTS MORE MONEY
- IT LASTS LONGER
- IT IS POLITICALLY VISIBLE

But importance can be measured differently:

- EMOTIONAL IMPACT
- CULTURAL SHIFT
- INTELLECTUAL PROVOCATION

Architecture structures how we move, gather, work, and rest. It frames social interaction and our relationship not only to nature but to ourselves and our communities and structural religious or political power

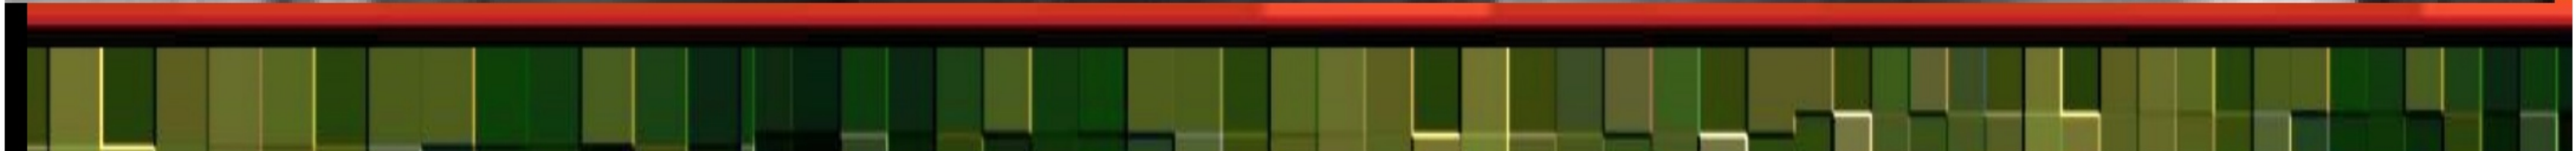

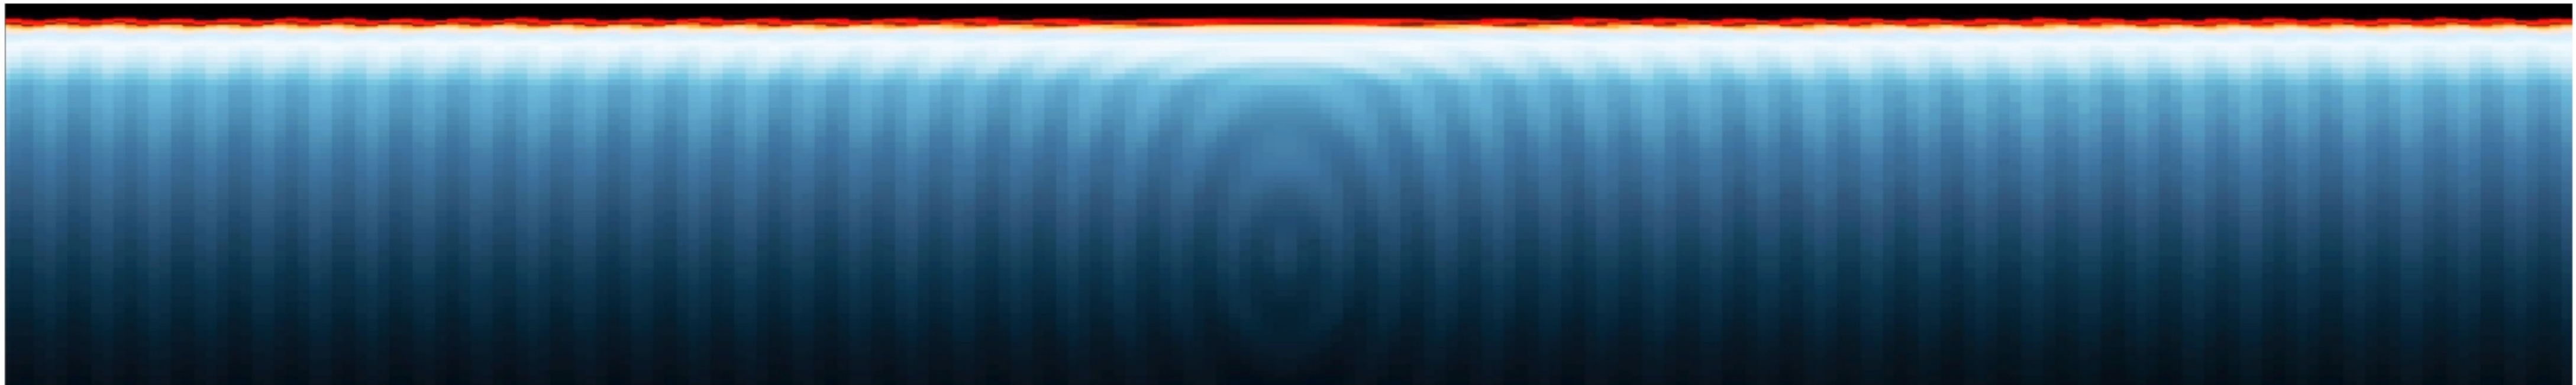

Winston Churchill famously said:

“We shape our buildings; thereafter they shape us.”

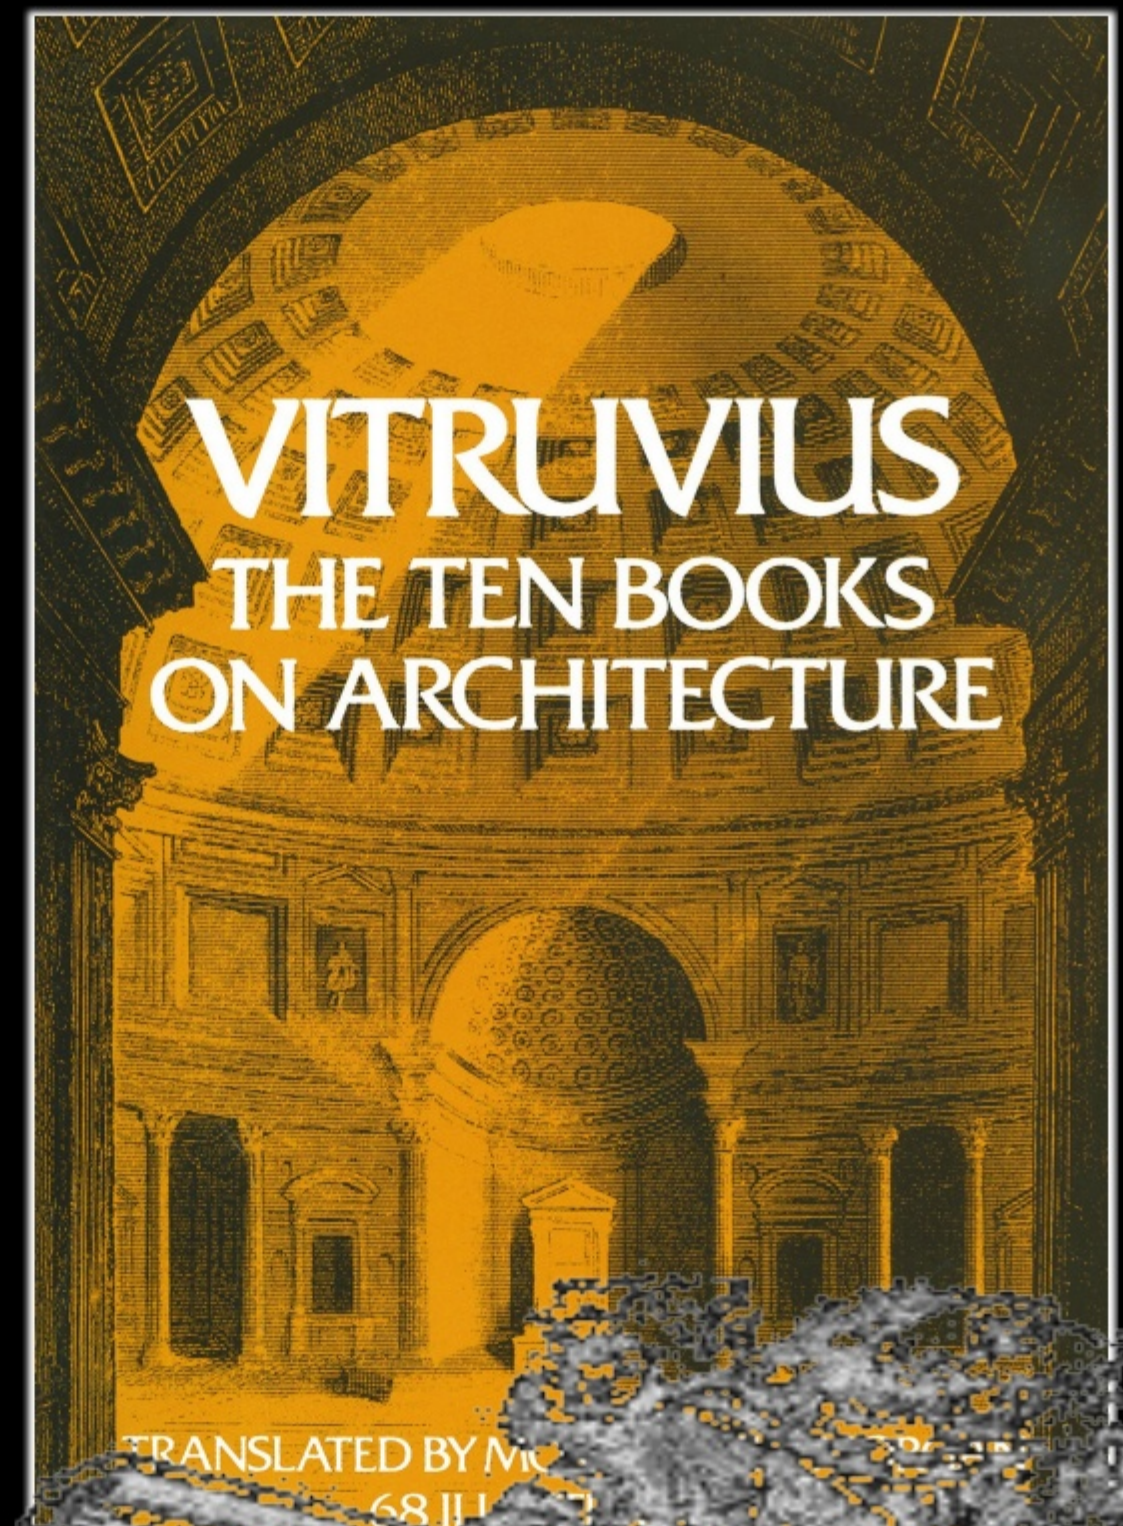

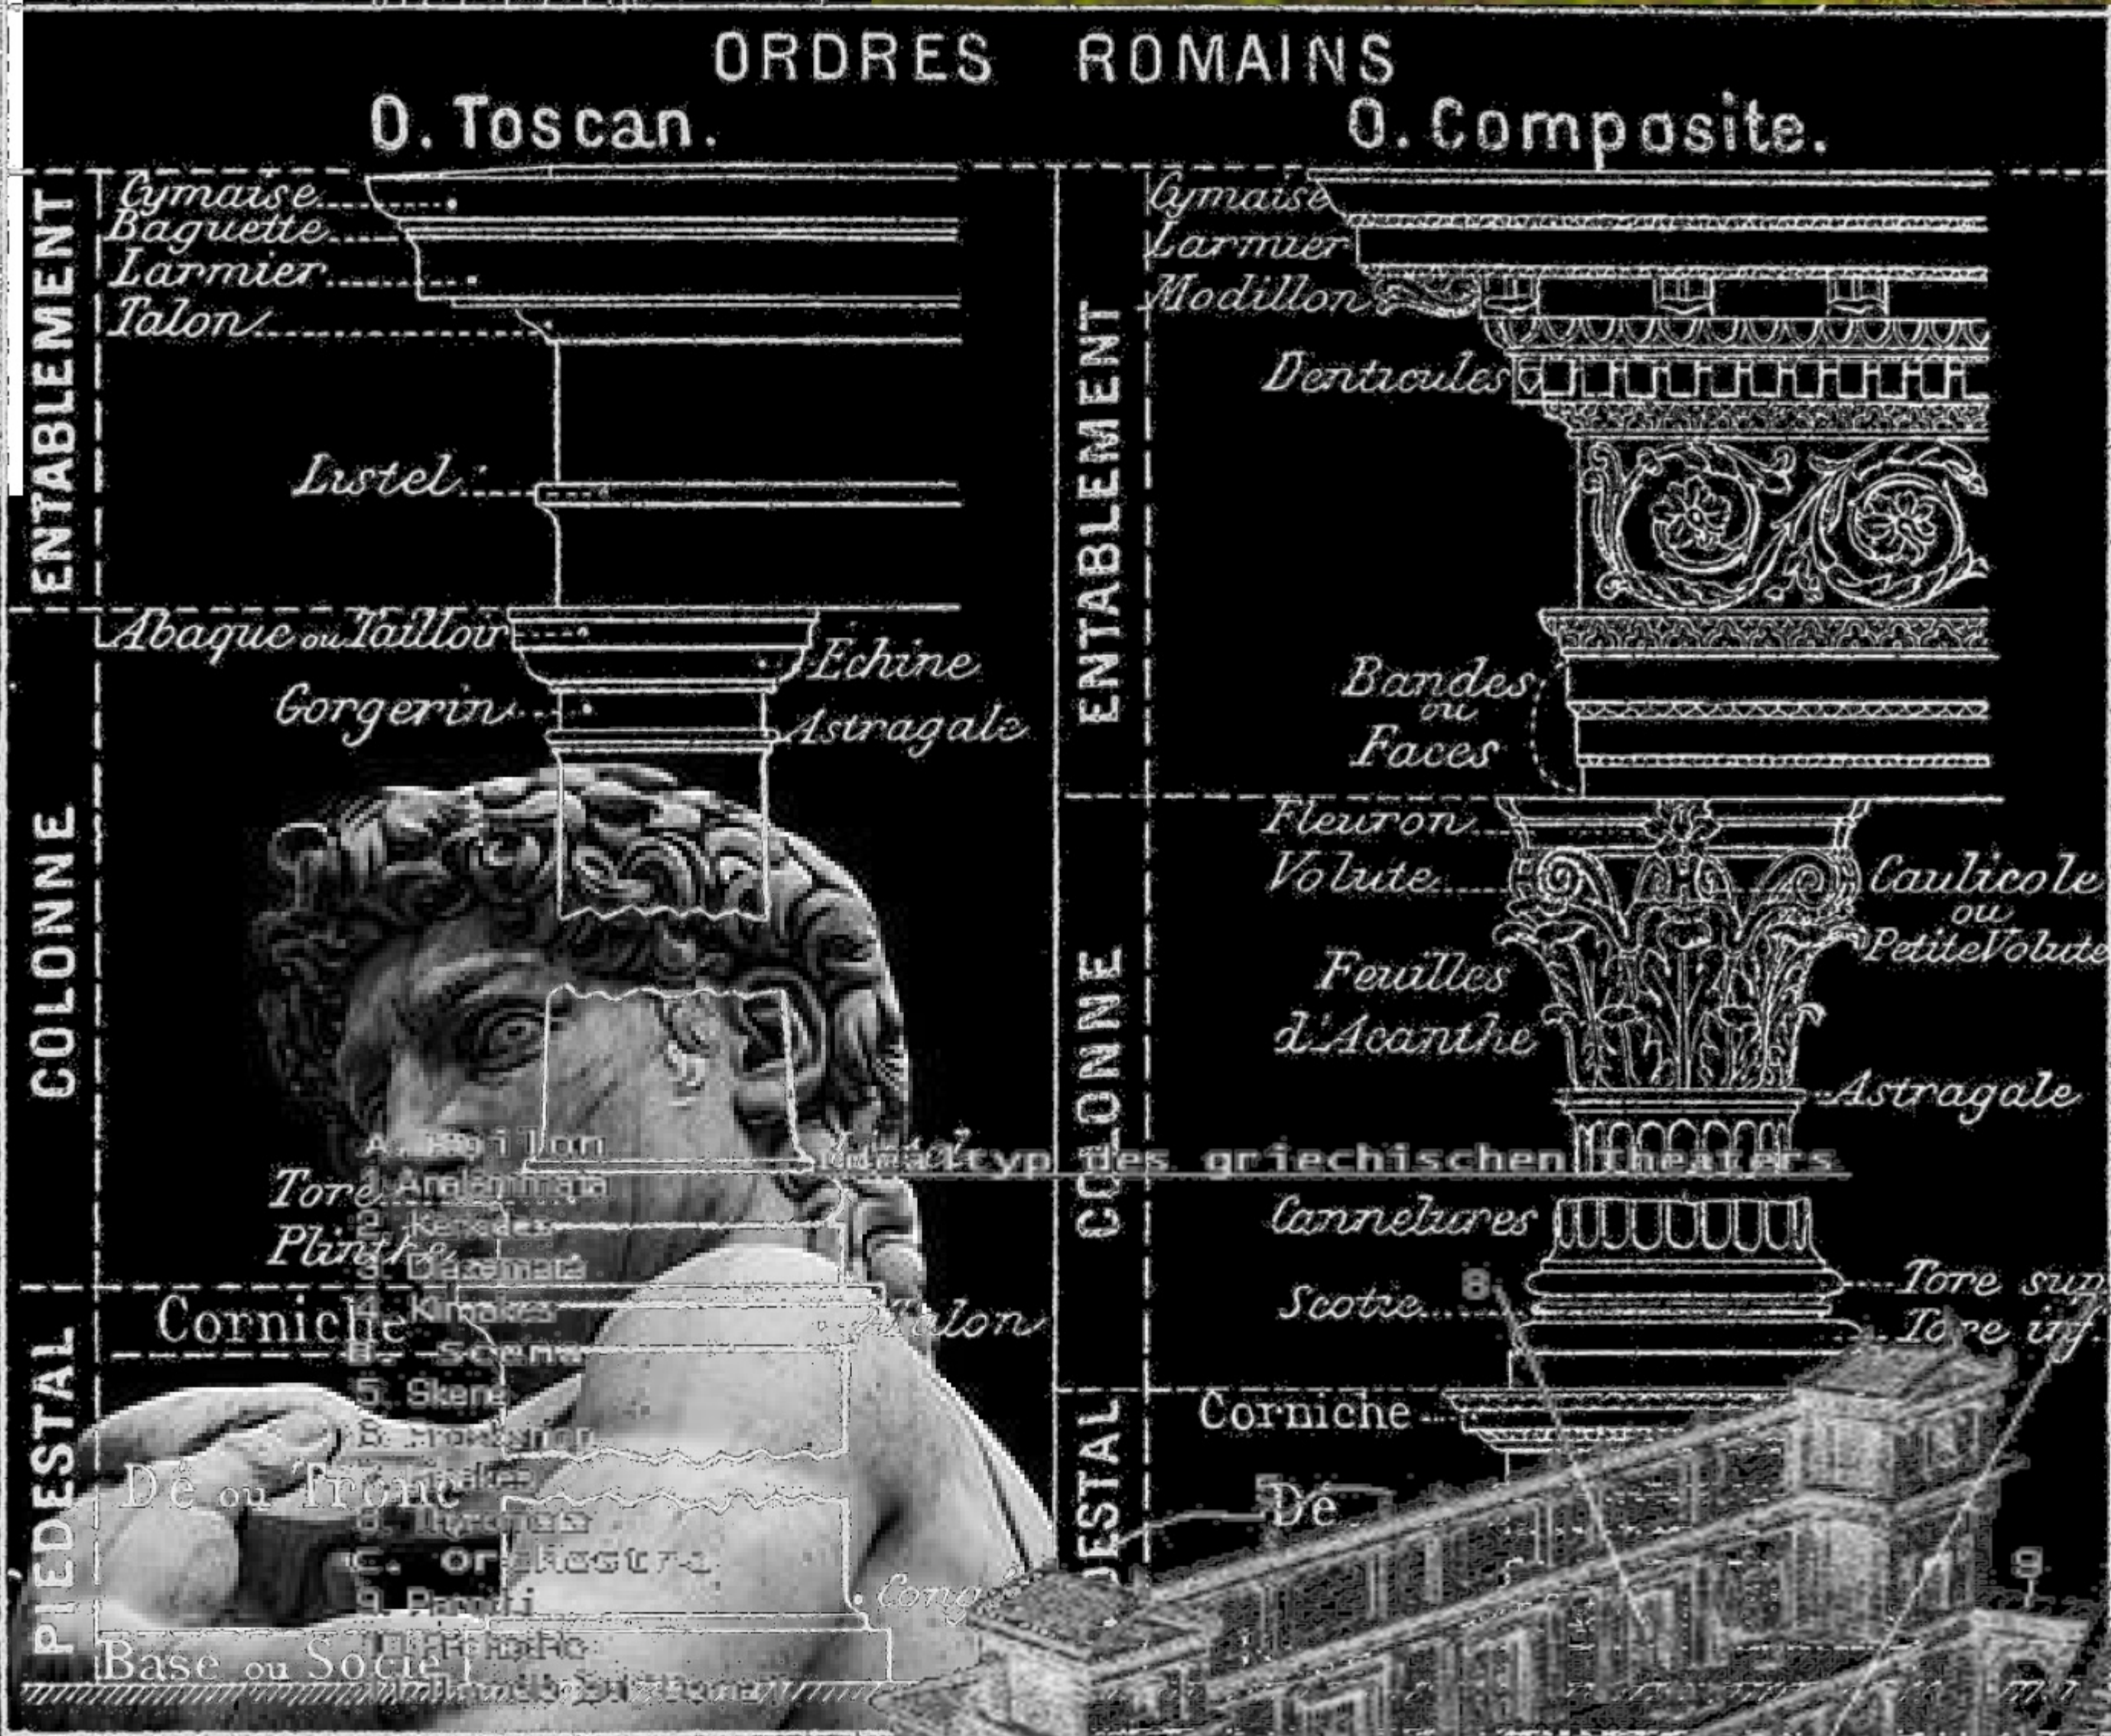

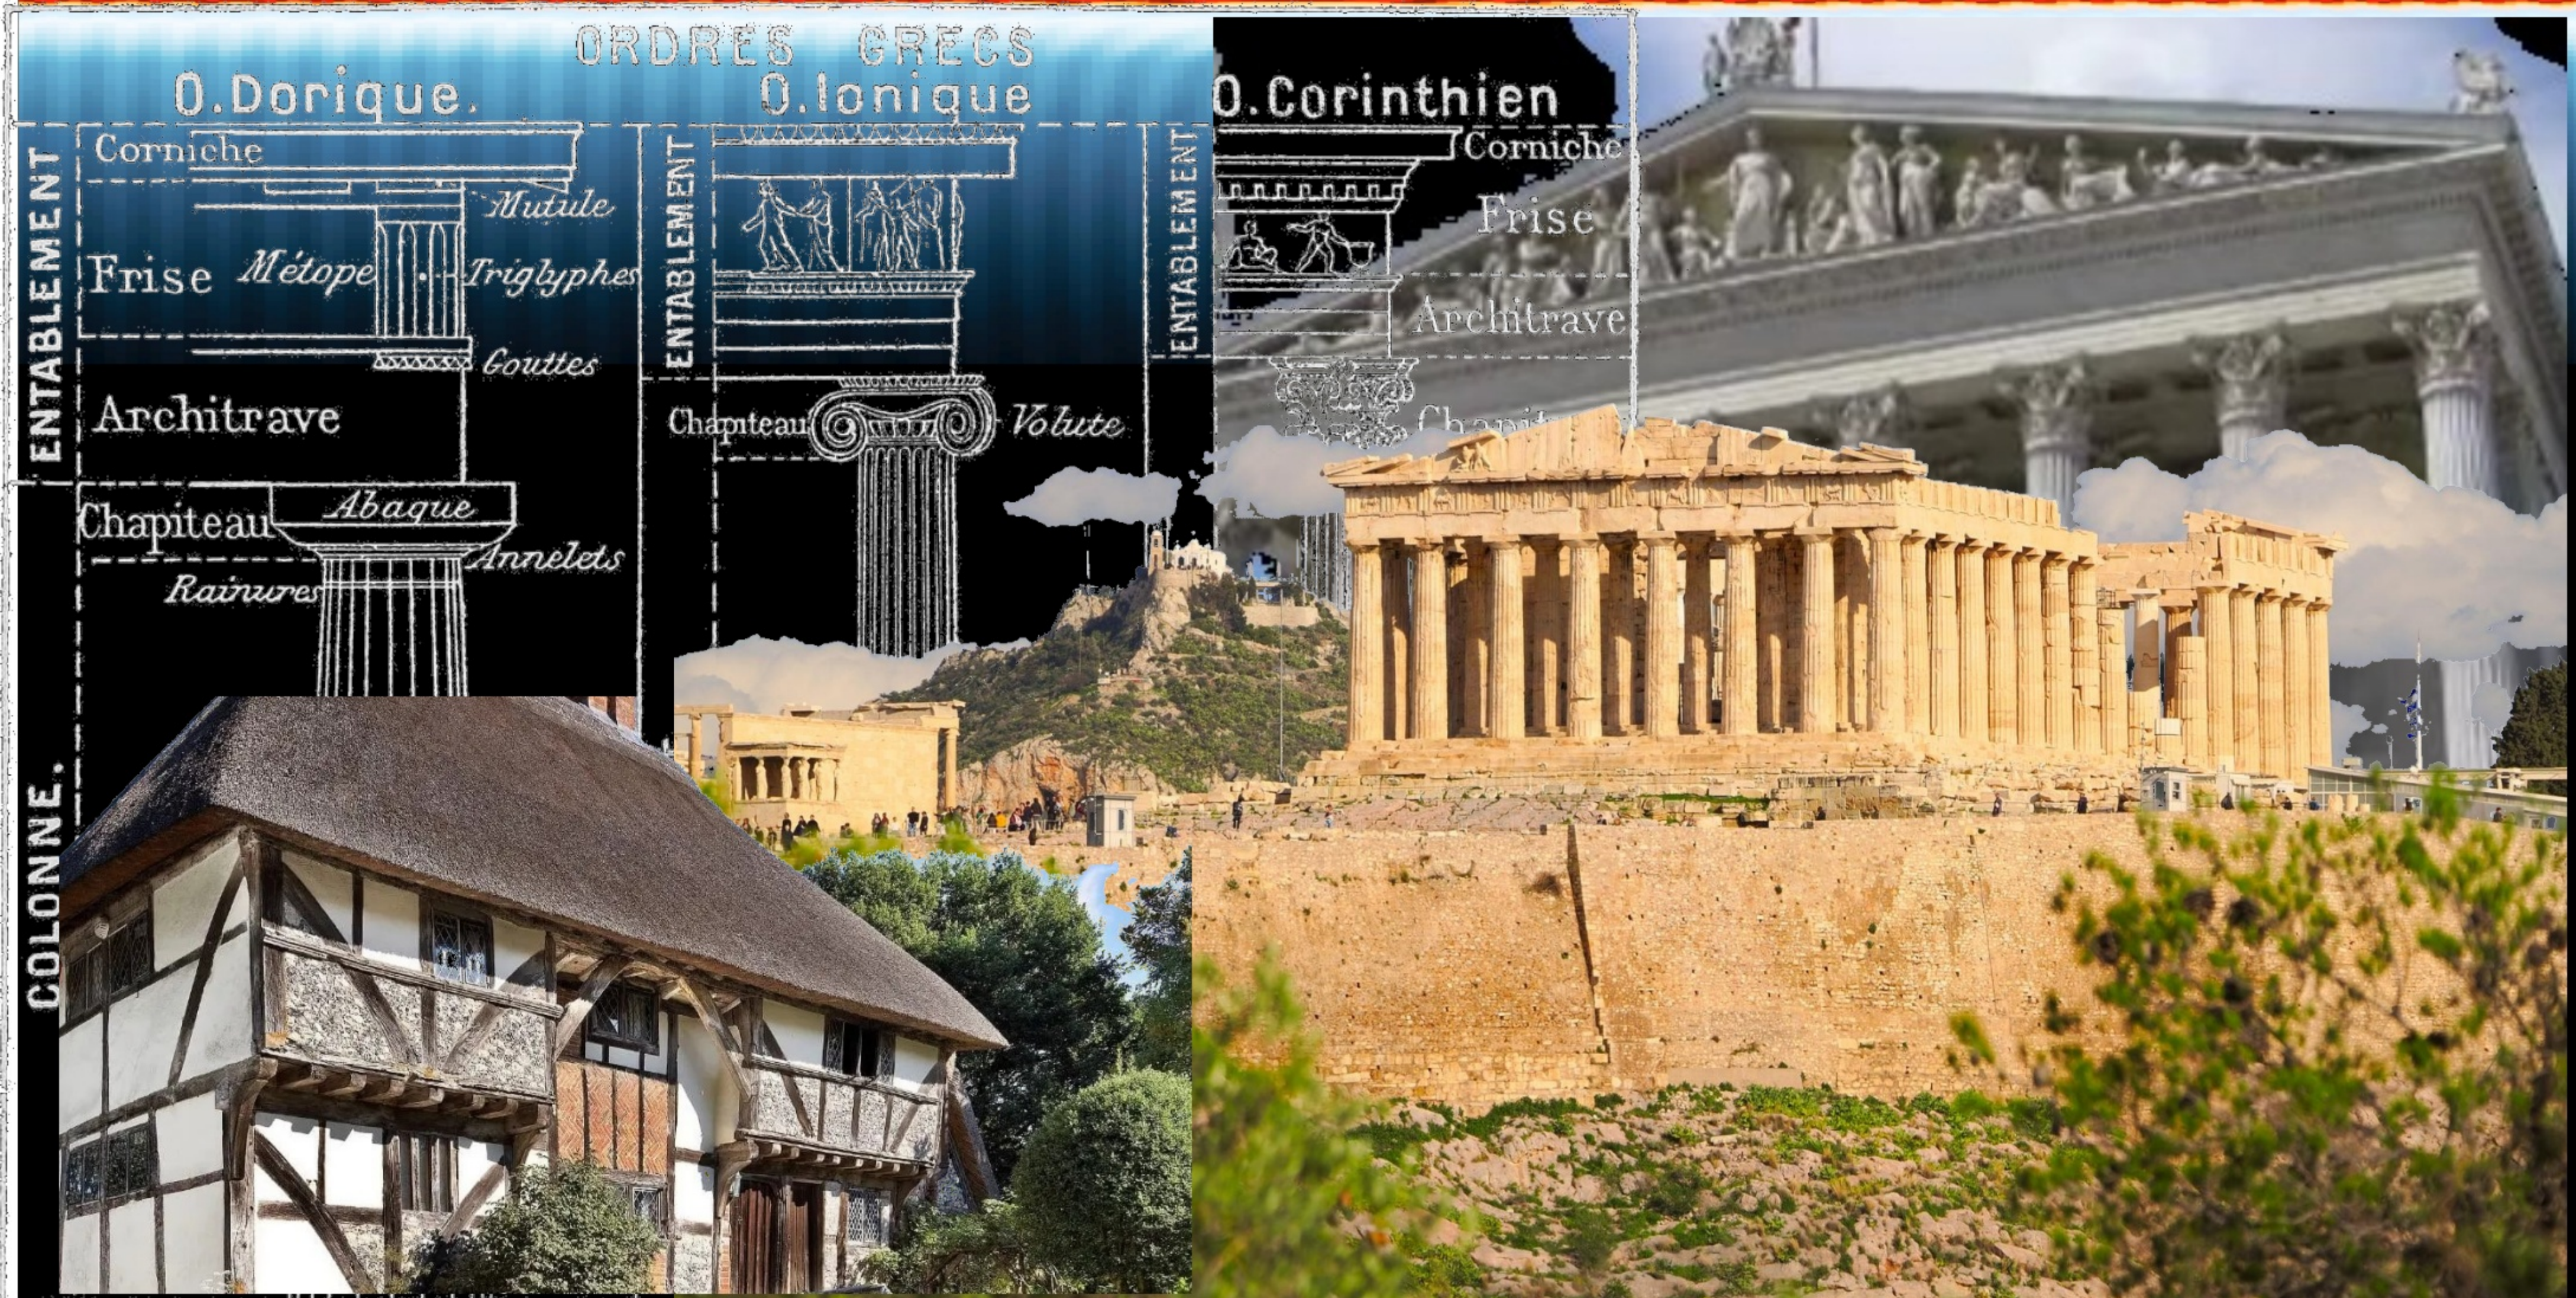

The argument here is psychological and sociological: buildings influence behaviour. A church inspires faith, a prison supports control. A high street promotes consumption.

Music and cinema may move us emotionally but they can't shelter us from a storm or provide a space for a family meal.

Historically, architecture has been called the “mother of the arts.”

ORDRES D'ARCHITECTURE (LES)

THE FOUNDERS OF MODERN ARCHITECTURE: LEFT TO RIGHT:

LOUIS SULLIVAN:

Form Follows Function: A design principle stating that the shape or form of a building or object should primarily relate to its intended function or purpose.

LE CORBUSIER

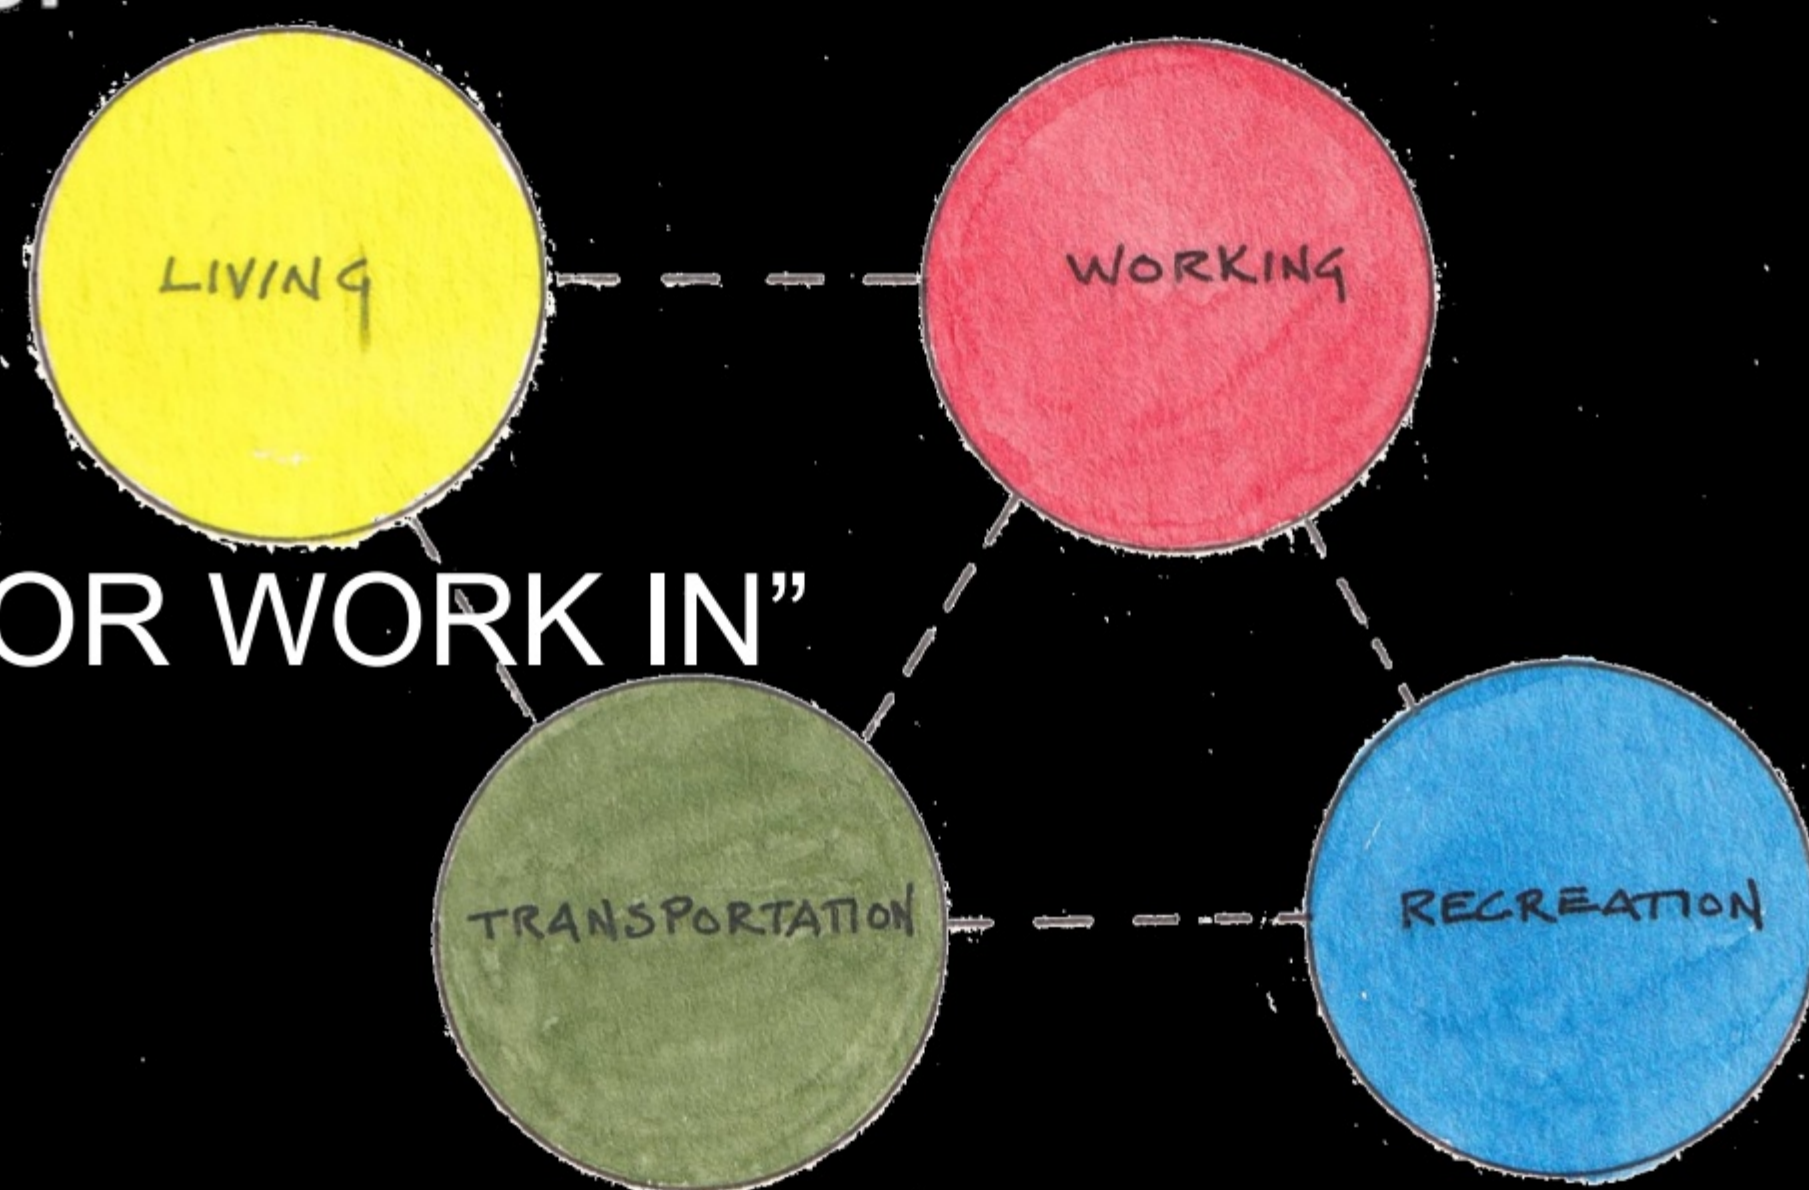

“FORM AS A GOAL IS FORMALISM”

MEIS VAN DEL ROE

“A BUILDING IS A MACHINE TO LIVE OR WORK IN”

FRANK LLOYD WRIGHT

“ORGANIC ARCHITECTURE”

“Whether it be the sweeping eagle in his flight, or the open apple-blossom, the toiling work-horse, the form ever follows function, and this is the law.”

- Louis Sullivan, 1896

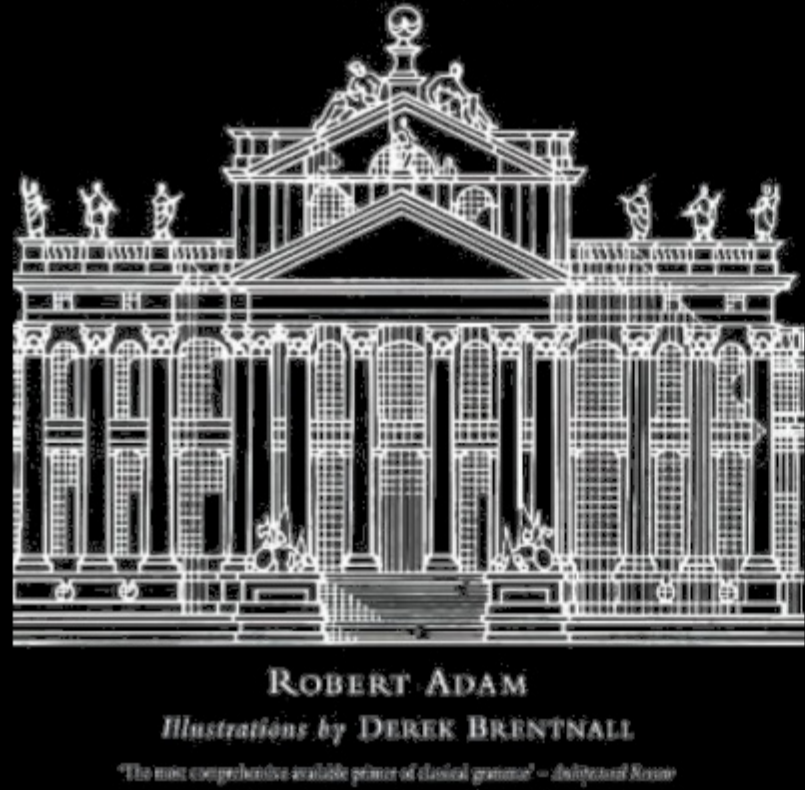

I/O LANDSCAPES ARCHITECTURE: IMMERSIVE ART

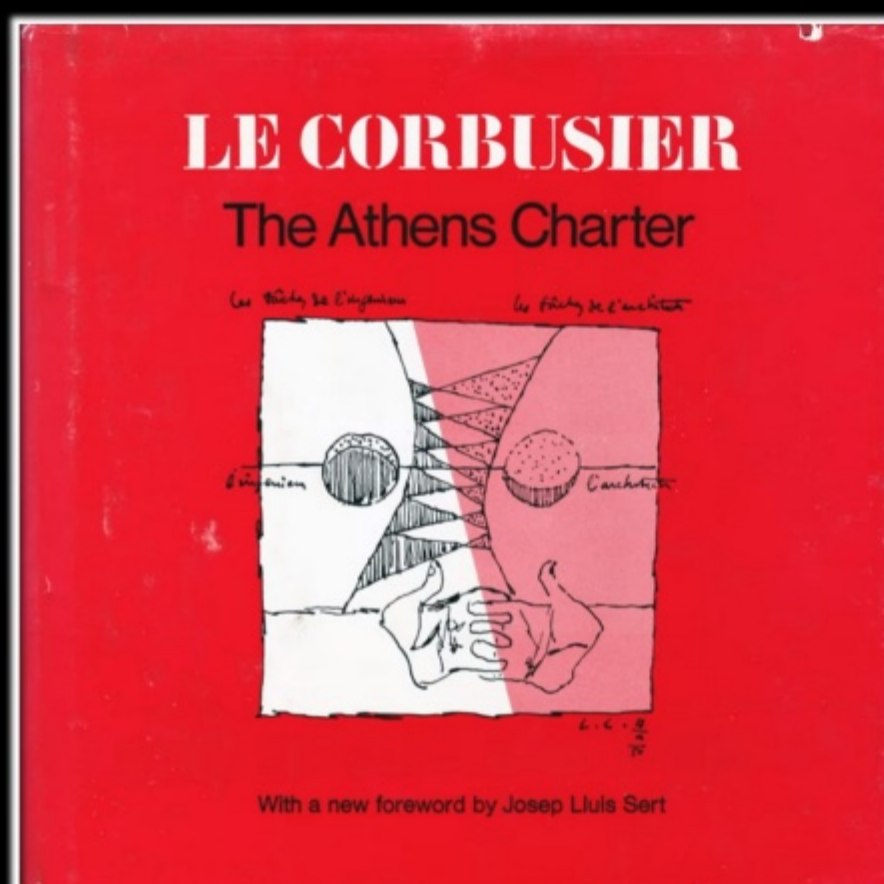

As I started to study Frank Lloyd Wright and his famous “Falling Water” house, I felt it would be useful to understand the modernist movement that he is connected to. the last 200 years in architecture (and many other art and cultural movements) is defined by these key 3 eras.

CLASSICAL ARCHITECTURE *A Complete Handbook*

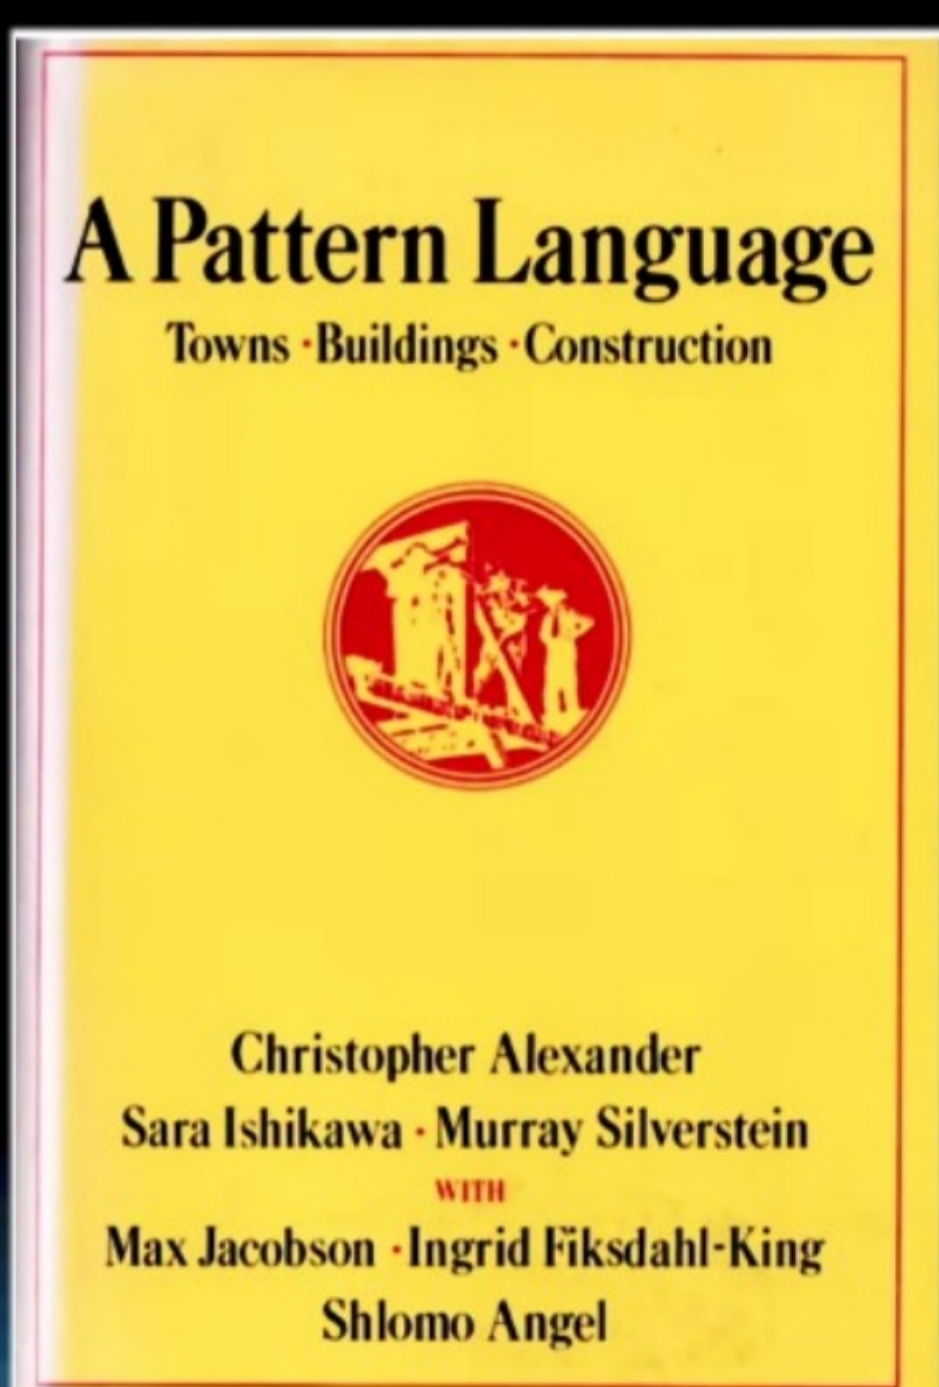

1 Traditionalism / Classical emphasised symmetry, proportion, and ornamentation. Buildings such as temples and theatres reflected cultural identity and aesthetic ideals rooted in history.

The past..

2 Modernism emerged from industrial progress., Modernism prioritised efficiency, clarity, and honesty of materials. . Bauhaus design principles championed minimalism and the motto 'Less is more'.

Early 20th Centuray

3 Post Modernism reacted against Modernism's rigidity. embraced symbolism, playfulness, and historical references. The phrase 'Less is a bore' captured the rebellion principles against Modernism's minimalism.

Late 20th Centuray

Core Definition

Etymology: Chief Builder

Intersection of Art and Science

Intentional Design of Space

Technical and Emotional Balance

Le Corbusier believed architecture should be rational, efficient, and suited to modern life, influenced by technology, mass production, and the need for healthier, better-planned cities. Buildings should work well for everyday life, not just look impressive. clean geometric forms, flat roofs, open interiors, and minimal decoration

REFLECTI/ONS:

better was overtaken for the need for FAST CHEAP housing solutions in the post war era resulting in poor quality, poorly funded and essentially poorly designed buildings urban areas became unsafe ANTI SOCIAL ghetto like concrete environments. Functionism was eventually deemed NAIVE and IDEALISTIC

“POST MODERNIST”

ideologies became the reaction and it's lack of any ambition to believe design could make a positive change made it ideal for consumer driven culture and globalism.

our landscape

Less Is A Bore

"Happily, it is possible to date the death of Modern Architecture to a precise moment in time.
Modern Architecture died in St. Louis, Missouri on July 15, 1972 at 3:32pm." [Charles Jencks]

Less is bore.

Robert Venturi
