

THE I/O PROJECT: FINAL EXAM ACTION LIST

Prioritized artistic direction,
digital refinement, and physical
execution strategy.

PREPARED FOR: LUKE
EXAM EXECUTION PROTOCOL

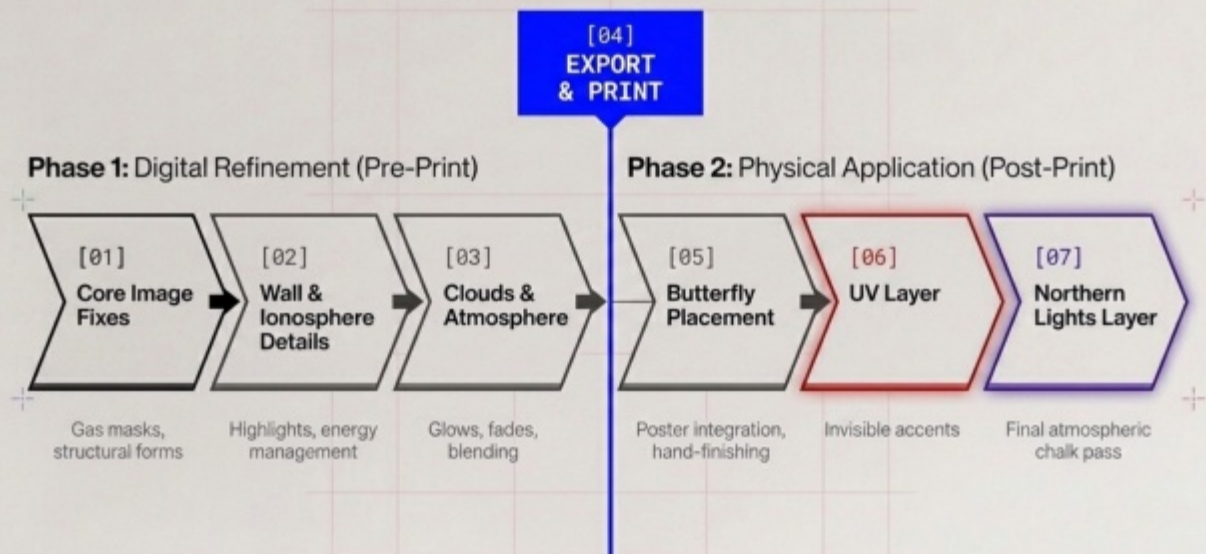

NotebookLM

The Aesthetic Blueprint

NotebookLM

Phase & Priority Roadmap

NotebookLM

Form & Structure Refinements

Tone down lighting/color.
Darken masks to grey.

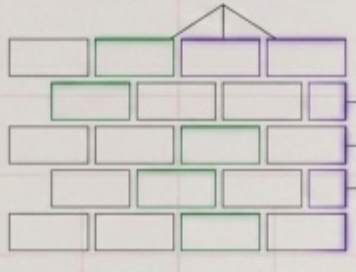

Keep reflections minimal (eye holes only).

Clarify shapes on the right.

Constraint: Do not overwork.

Add subtle pink/green highlights to brick lips, wall frame edges, and top edge above three-high window.

Add subtle pink/green highlights to brick lips, wall frame edges, and top edge above three-high window.

Goal: Wall must slowly disappear into space; avoid abrupt stops.

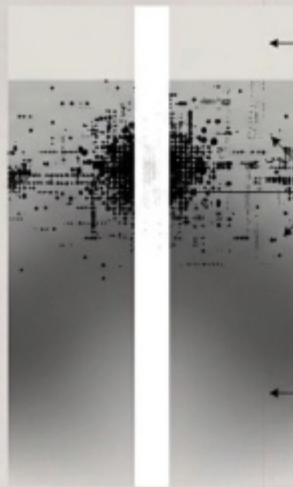

Thin and soften the central line.

Create an atmospheric fade/gradient under the tree to increase sense of distance.

NotebookLM

Atmosphere & Energy Management

Ionosphere & Black Line

Narrow the empty space section.

Intensify the black edge line and concentrate activity around it. Reduce overall color.

Restore soft fade toward the floor (Left side fade must be larger and smoother).

Middle Cloud Fixes

Soften bottom straight edge; extend it down into the b&w ionosphere.

Darken the cloud moving left.

Add a highly restrained glow (pink, green, or tiny lightning) to one side only. No heavy saturation.

NotebookLM

The Organic Metamorphosis Sequence

The Cascade

The Tree Silhouette:
Darken to silhouette with slight brown tones inward.
Add bright white edge on the far-right sky.

Stage 1: Brown & Orange leaves
(Highest volume).

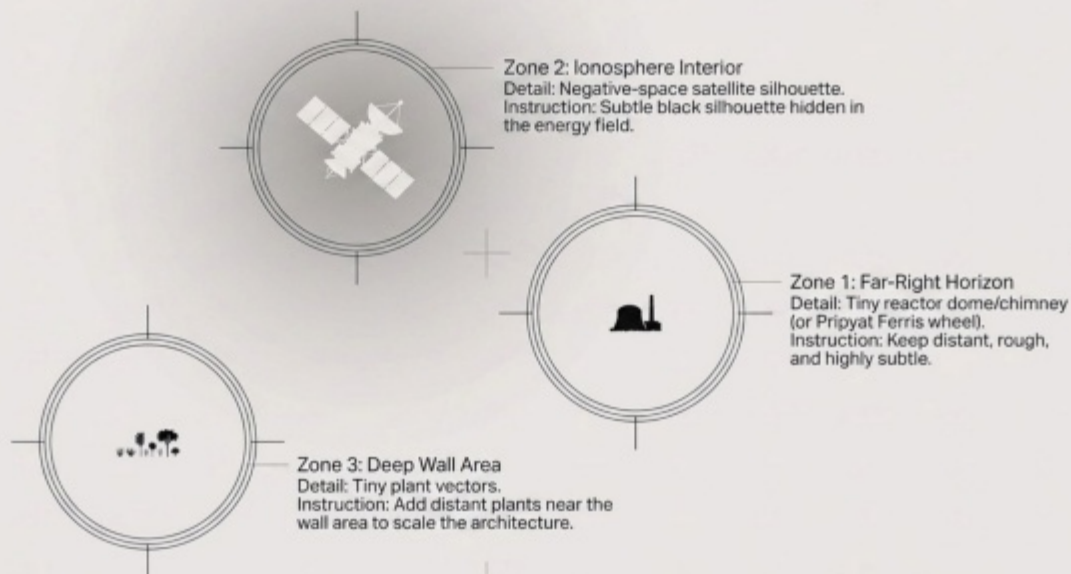

Stage 2: Yellow leaves (Sparse volume).
Raise leaf pile, fade away before canvas edge.
Remove extreme bottom-right corner leaves.

Stage 3: Transition.
Secretly blend yellow leaves into natural butterfly forms.

The Hero Outcome:
The final lowest shape is the Yellow Butterfly.

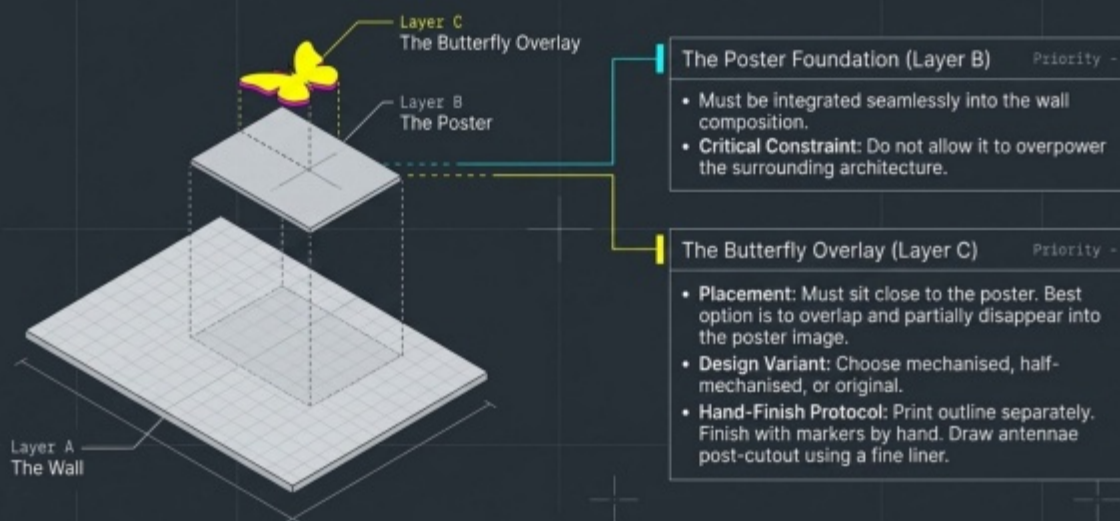

NotebookLM

Embedded Narrative & Micro-Details

NotebookLM

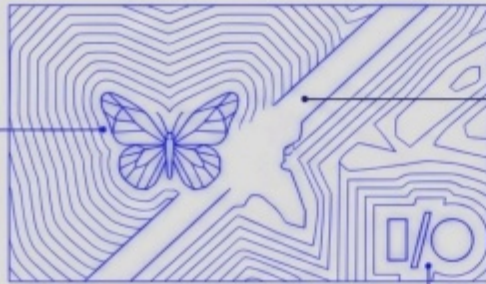

Physical Phase Execution: The Hero Asset

NotebookLM

Physical Phase Execution: Invisible & Atmospheric Layers

Layer 06 – UV Pen (The Invisible System)

Rule: Keep application strictly minimal.

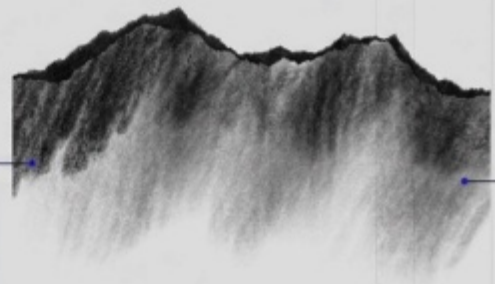

Required Elements:

- Butterfly wings
- Luke silhouette
- Black intersection line
- I/O logo

Optional Elements:

Tiny circles/marks around the black strip.

Layer 07 – Northern Lights (The Atmospheric Finish)

Process: Draw line -> Drag finger to blend -> Test on spare print first.

The Torn Paper Method: Use a ripped-paper masking technique to create crisp but naturally atmospheric edges.

Rule: This must be the absolute LAST physical layer applied.

NotebookLM

Execution Matrix: Restraint vs. Overwork

	✓ Target (Do This)	✗ Trap (Avoid)
Detail & Form	Slowly discovered, hidden forms. Subtle reflections (eye holes only).	Over-detailing elements. Making gas masks too abstract. Letting the poster overpower the wall.
Color Application	Monochromatic base with subtle touches (pink/green wall edge highlights).	Heavy color saturation. Color overload in the Ionosphere. Symmetrical glowing clouds.
Canvas Boundaries	Soft fades toward the floor. Wall dissolving into space. Ripped-paper chalk edges.	Abrupt stops. Thick, heavy horizon lines. Straight, unnatural cloud edges.

FINAL CHECK BEFORE SUBMISSION: Does it successfully merge invisible systems, nature, technology, and memory?
