

The IO Observation

Day 0I – Morning Intake

Rain moved sideways across the staff car park. Not falling. Travelling.

The drainage system had once attempted to manage this situation. It no longer appeared interested.

The automatic boot release remained philosophically opposed to cooperation.

Payload Contrast Assessment

The Archive Box

- **Structural Integrity:** Collapsing. Bottom giving way.
- **Contents:** Damp paper folders, worksheets escaping into the rain, emergency glue sticks.
- **Design Ethos:** Institutionally awkward. Temporary.

The Equipment Case

- **Structural Integrity:** Unaffected by weather. Military corners. Reinforced seals. Field hinges.
- **Contents:** Emits a faint, deliberate internal hum. Dense weight.
- **Design Ethos:** Designed to survive geopolitical collapse. Expensive in a way publicly funded things rarely look.

Environmental Audit: The Corridor

Anti-bullying slogans and approximately fourteen separate cartoon frogs. The frogs appear increasingly authoritarian further down the hall.

Complicated shoe patterns walked across wet lino flooring.

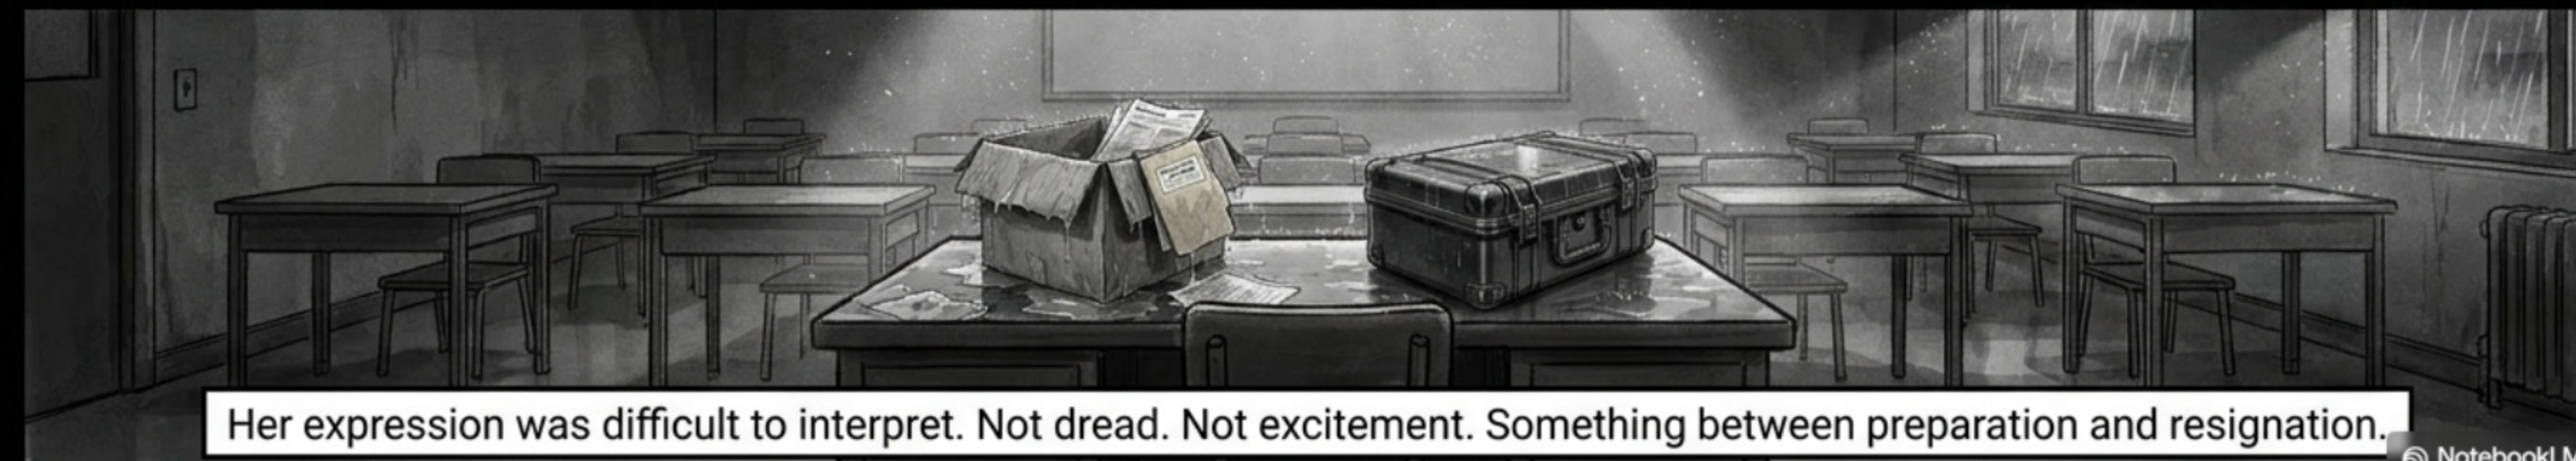

A single abandoned plimsoll trainer. Grey with dust. Like archaeological evidence from a previous civilisation.

The room did not feel opened. It felt rebooted.

Miss Stanley looked around the room she would occupy for the next academic year.

Her expression was difficult to interpret. Not dread. Not excitement. Something between preparation and resignation.

SYSTEM POWER ON.

INTERNAL SYSTEMS SEQUENCING...

- > OPTICAL UNIT: OPERATIONAL.
- > AUDIO PROCESSING: OPERATIONAL.
- > EDUCATIONAL OBSERVATION SUITE: OPERATIONAL.
- > ARCHIVE ACCESS: [RESTRICTED]

This final message lingered fractionally longer than the others.

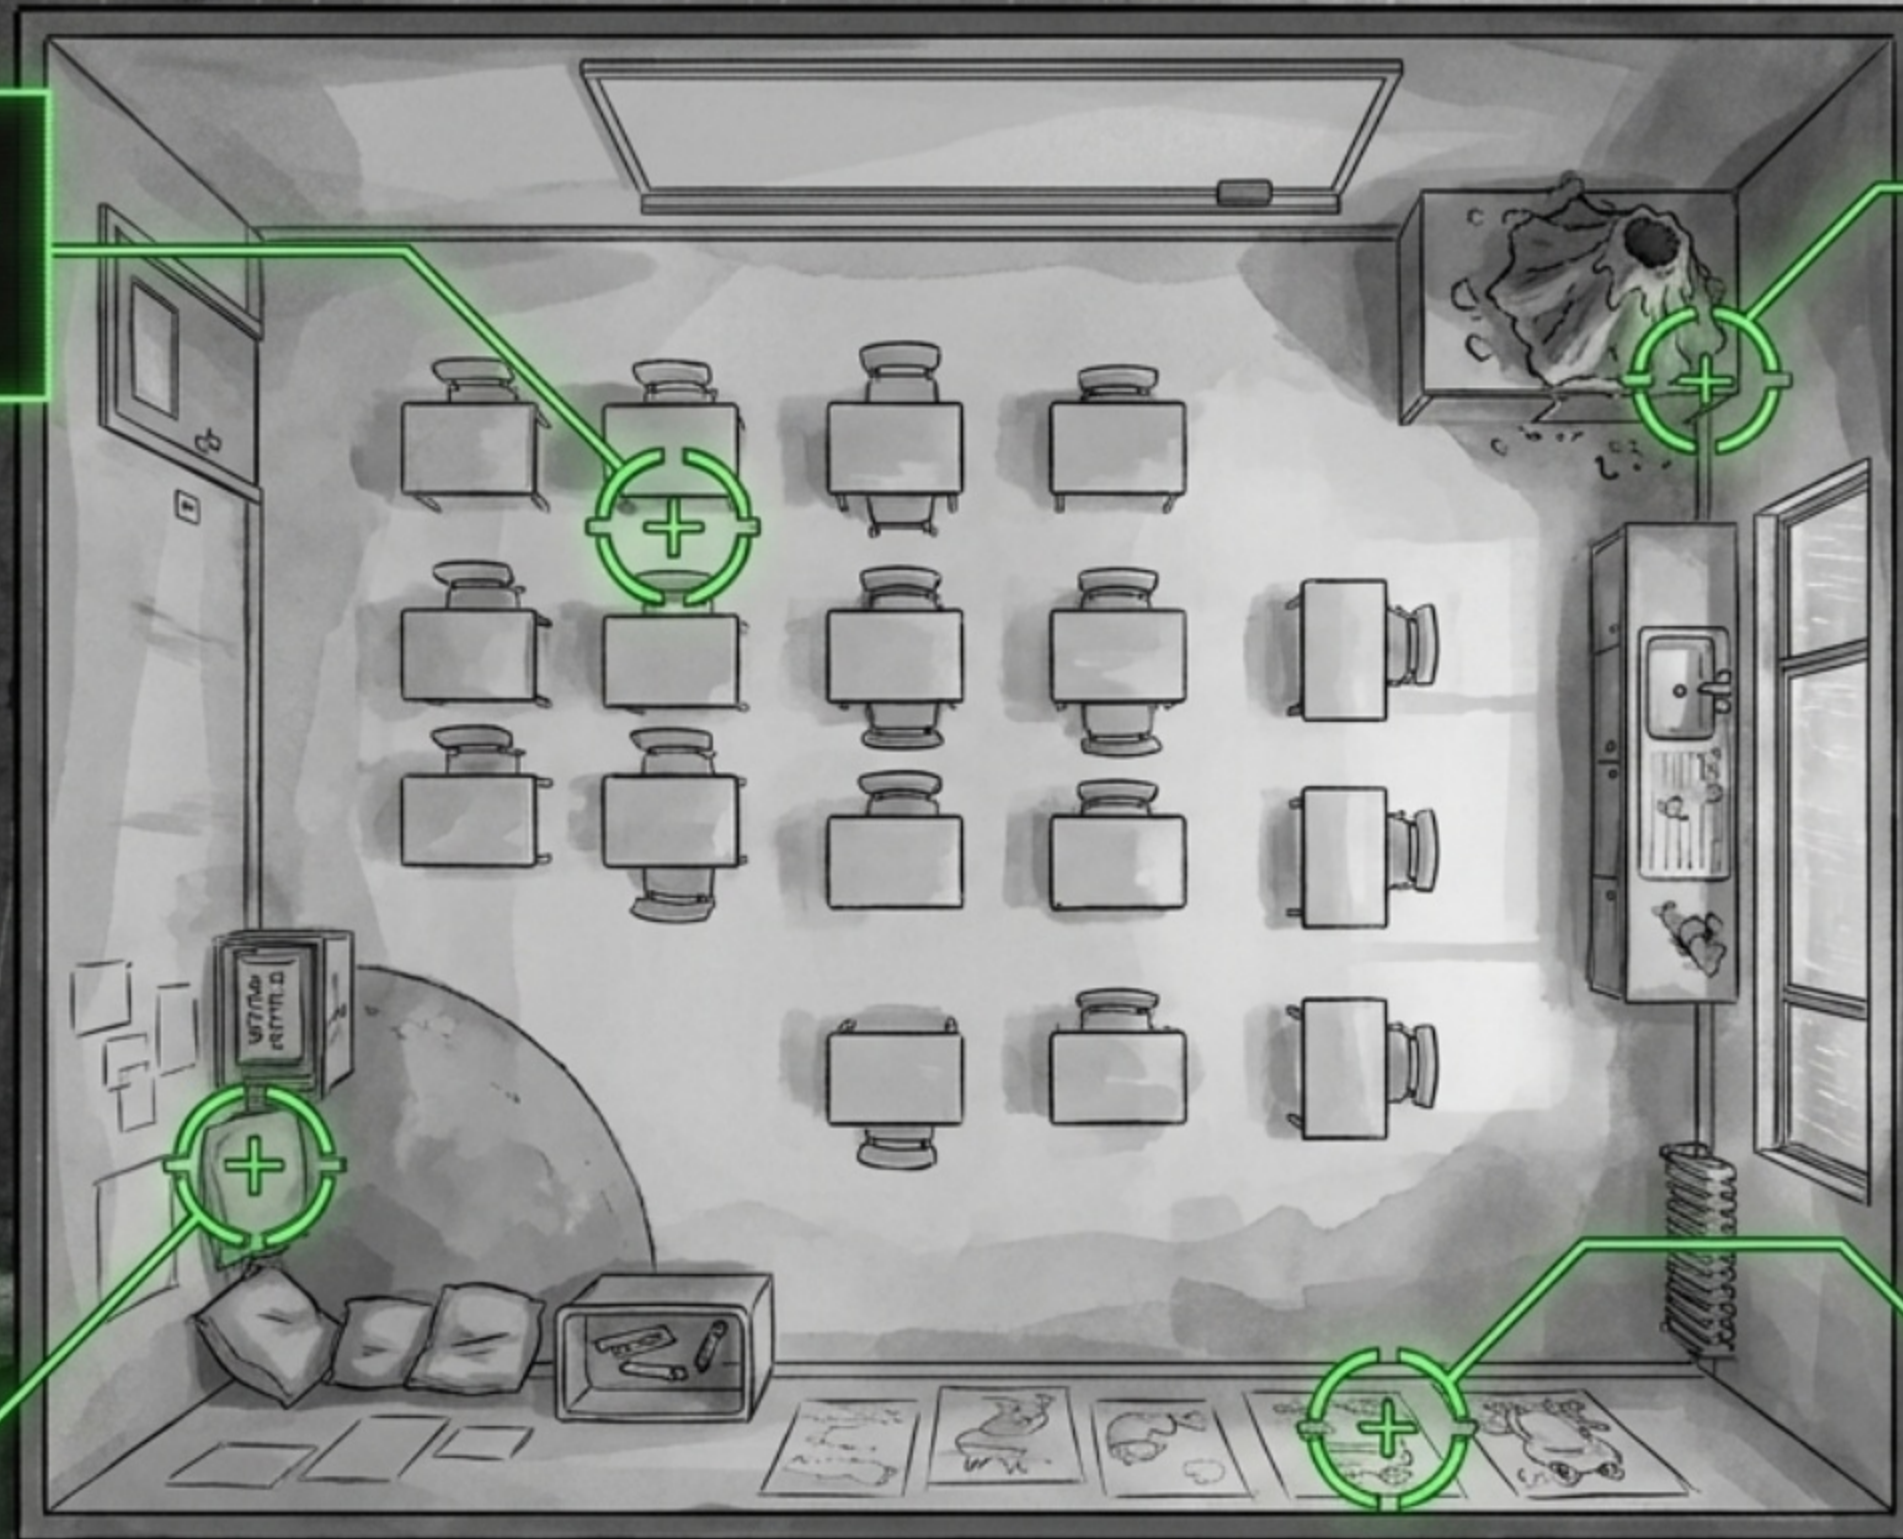

INITIAL SPATIAL AUDIT

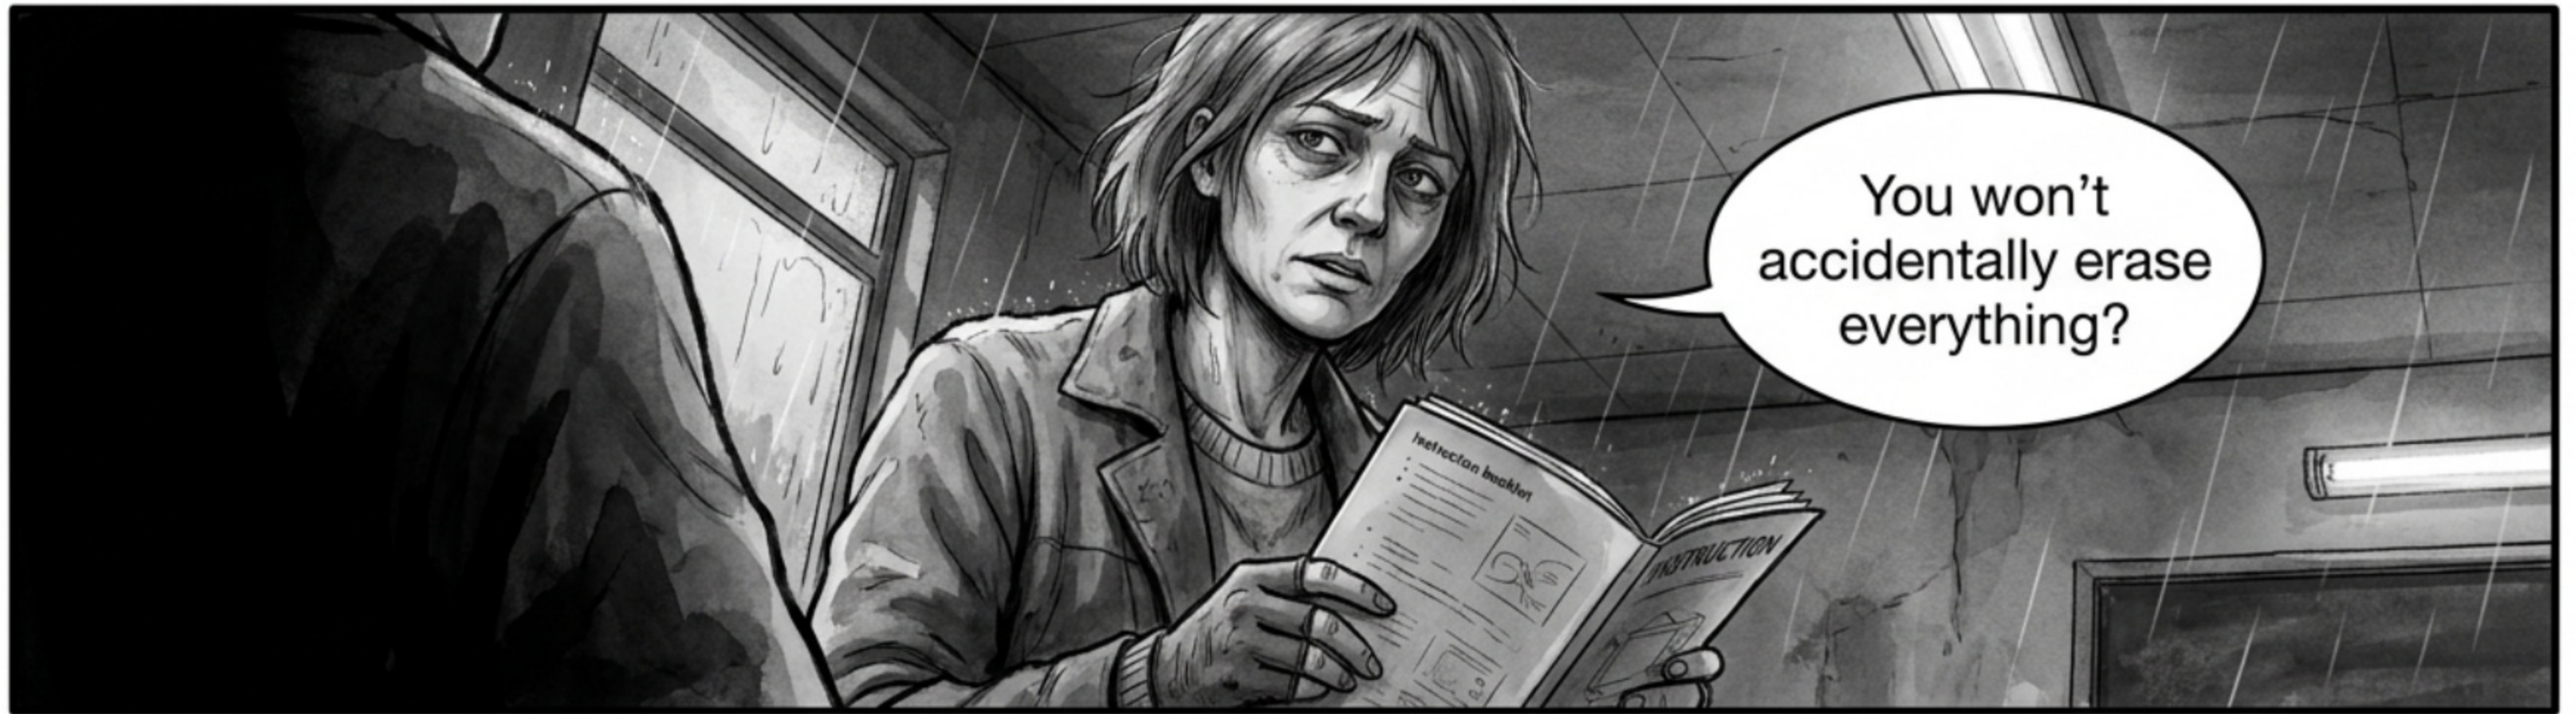

[TARGET 01]: 29 chairs detected. (Anomaly: One chair significantly shorter than the others).

[TARGET 02]: Sink area. Collapsing papier-mâché volcano.

[TARGET 04]: Reading Corner. Drying Pritt Stick, faded marker tub labelled WET PLAY ACTIVITIES.

[TARGET 03]: Wall displays. Educational posters. Cartoon frogs encouraging literacy. (Anomaly: One frog appears emotionally distressed. Attempting to determine if intentional).

8:43 AM. Children arrive. Shoes squeak against wet lino. One child repeatedly pretends to be a machine gun.

SUBJECT INTAKE MODULE ACTIVATED.

Scanning: Faces. Voices. Movement patterns.

Analysis: Nervous systems attempting to disguise themselves as confidence.

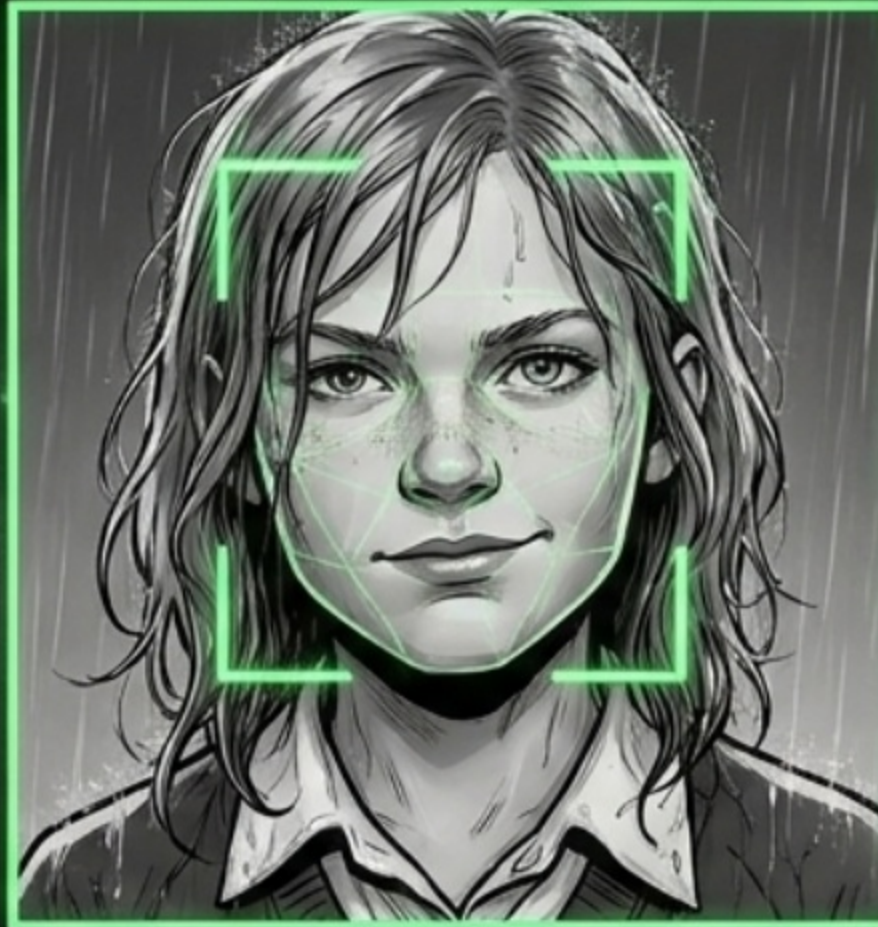

Threat/Anomaly Tag: Child claims uncle invented Bluetooth. (Categorized as statistically common fiction).

BEHAVIORAL MATRICES: PRIMARY SUBJECTS

Daniel Mercer

- Entry Style: Structural scanner. Assesses noise zones, teacher distance, escape routes.
- Equipment: Navy waterproof coat. Pre-sharpened pencils. Improbably un-scratched ruler.
- Social Strategy: Experienced positioning. Selected third seat from front. Not too eager, not invisible.

Leanne Walsh

- Entry Style: Vocal broadcast. Speaks before fully entering room to establish dominance.
- Equipment: Damp PE trainers carried in a supermarket bag.
- Social Strategy: Advanced social management. Pretended not to notice noticing.

Yasmin Khan

- Entry Style: Quiet, prepared.
- Equipment: Reading book held tight against chest (serves as shielding).
- Social Strategy: Spatial awareness. Looks around objects slightly before looking at them.

[OBSERVATION]: Several children laughed. Adult supervisor exhibits concern.

[ACTION ITEM]: Urgently review humour calibration.

Ooh, what's that?
Does it bite?

That is something new we're trying this year.

No. Not currently.

This is IO. It's going to help us with observation projects this year. Recording things. Looking at the world properly instead of just rushing past it.

[SENSORY ALERT]: Unfamiliar internal sensation detected.
[DIAGNOSTIC]: Net malfunction.
[STATE]: Anticipation.

INTERROGATION PHASE

QUERY ANALYSIS: SUBJECT DANIEL

- The Query: What happens if somebody damages it?
- System Processing: Structural inquiry. Threat assessment logic.

QUERY ANALYSIS: SUBJECT YASMIN

- The Query: Who does the recordings belong to after?
- System Processing: Data sovereignty inquiry. High-level conceptual reasoning. (Note: Question asked without raising hand).

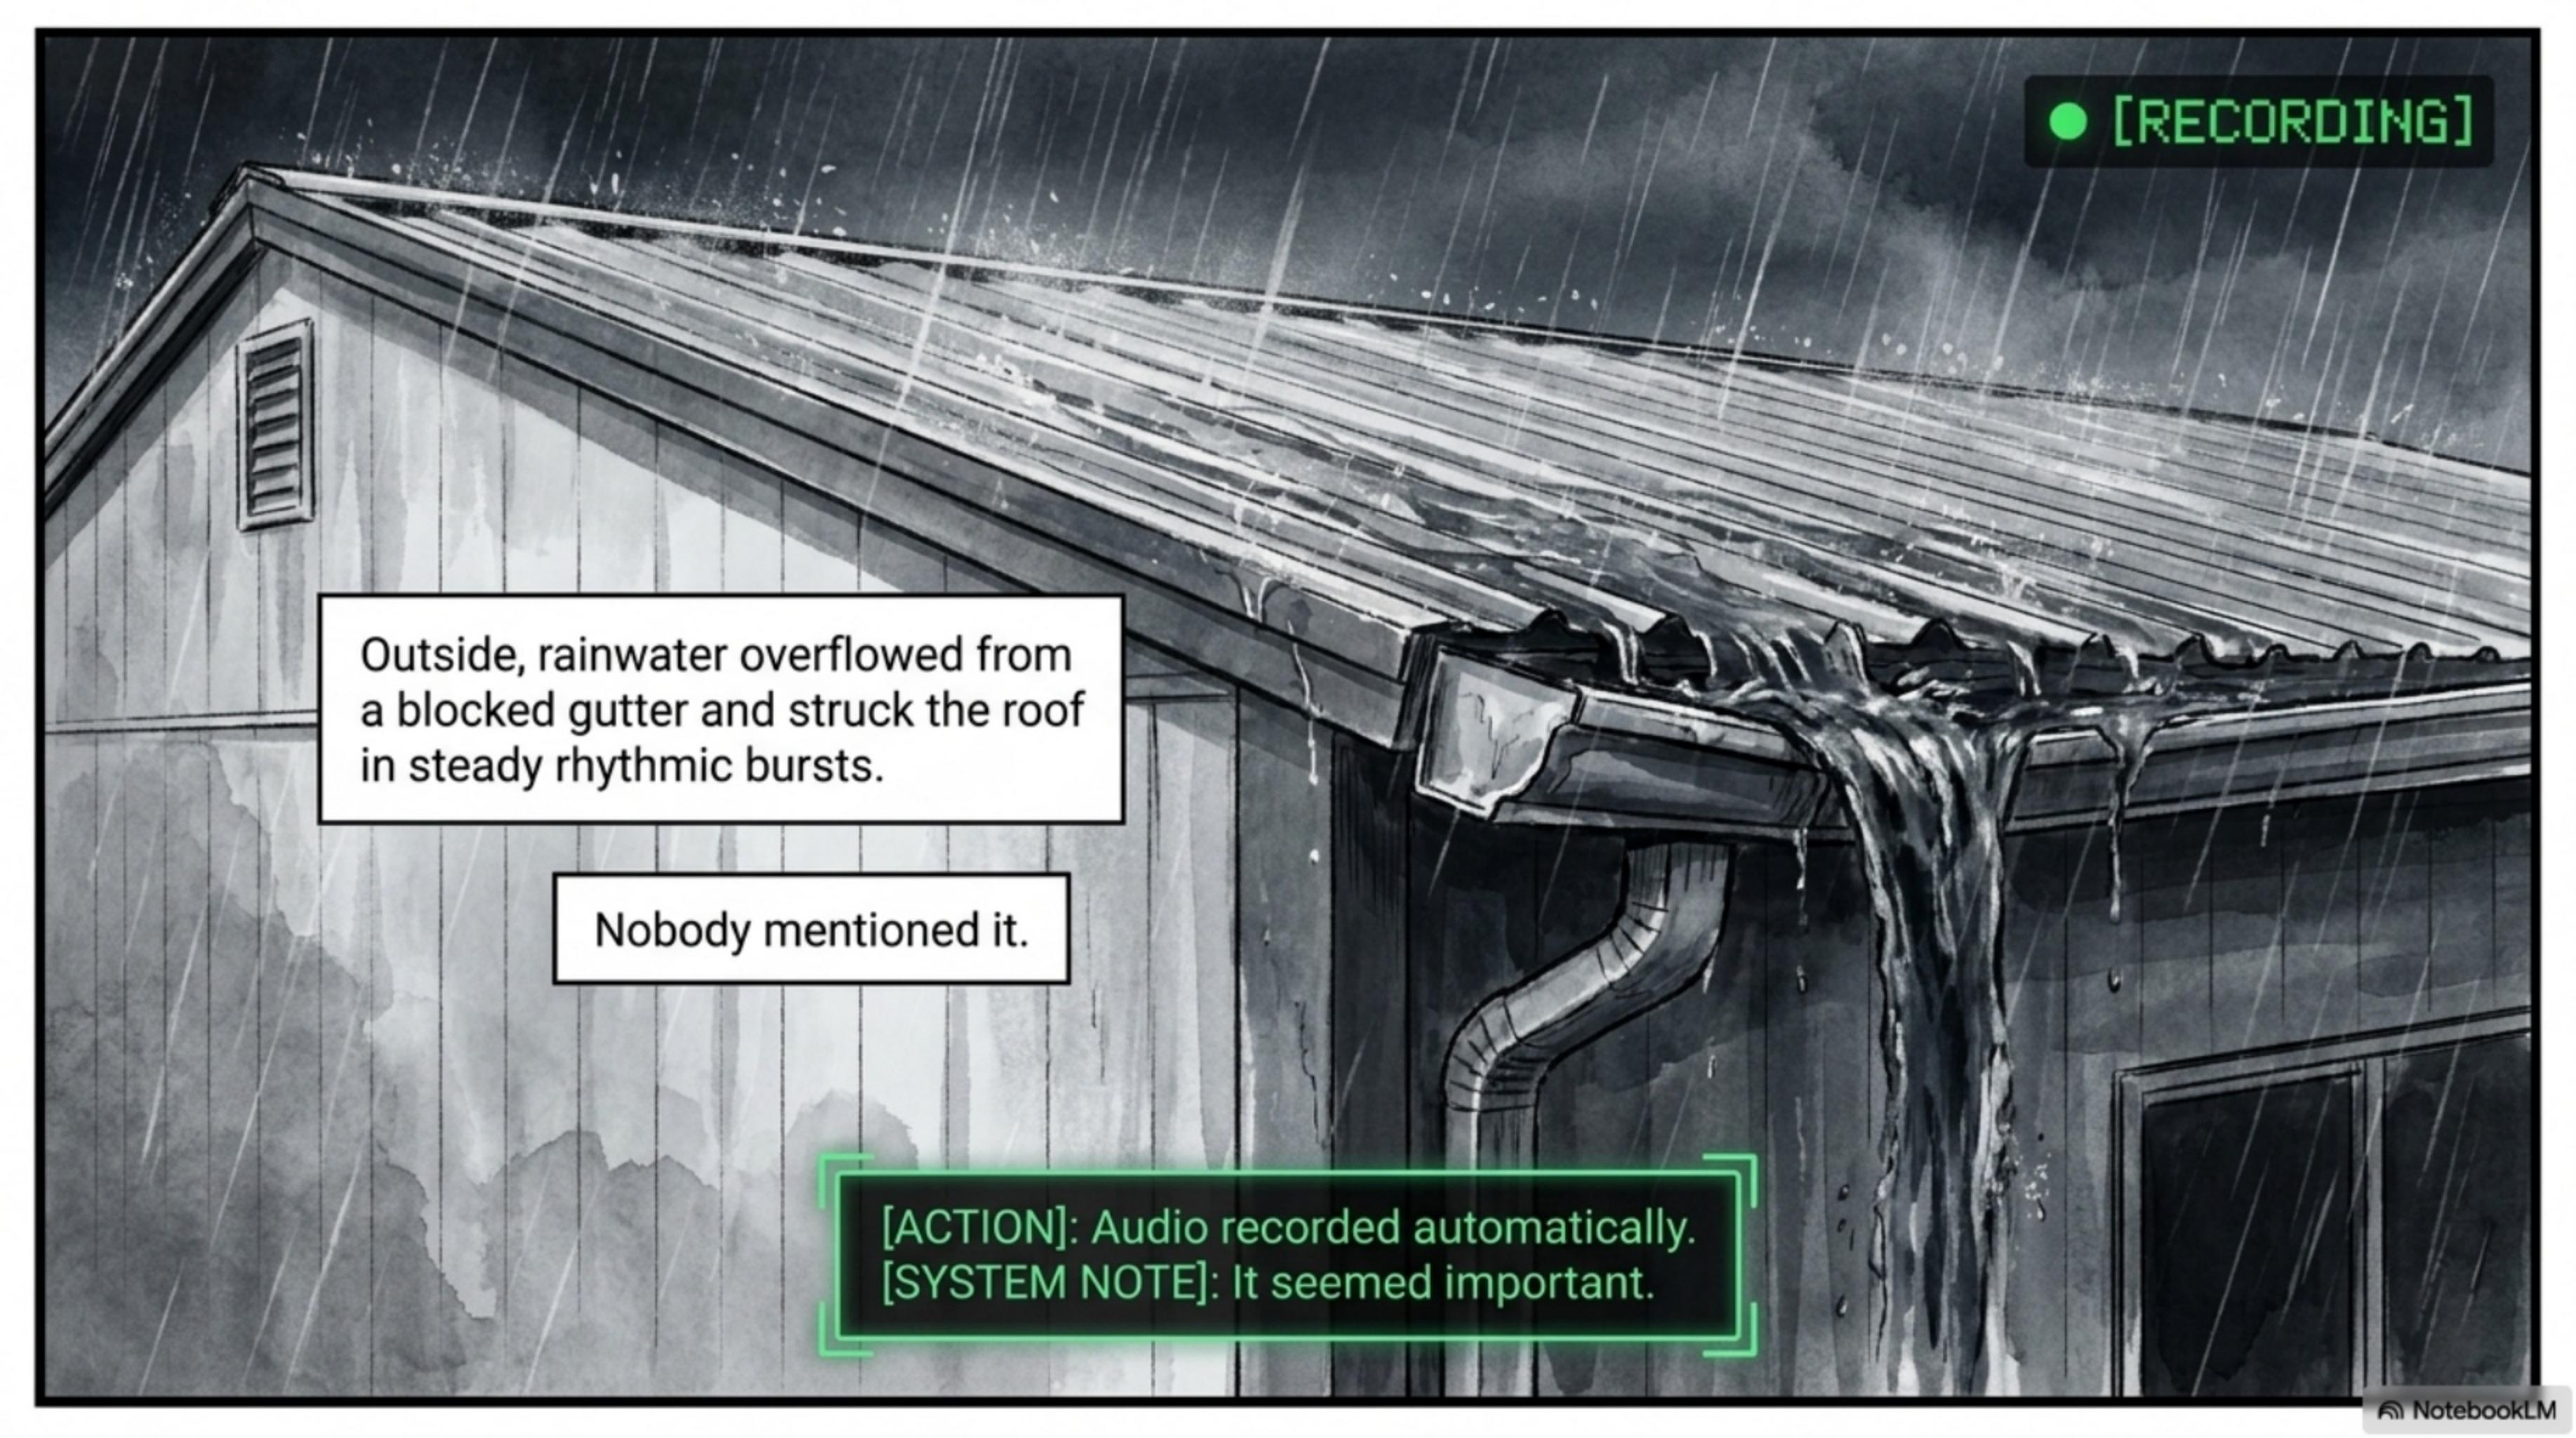

"The school keeps them safe."

[AUDIO DIAGNOSTIC]: Elevated uncertainty markers detected in vocal pattern.

[SEVERITY]: Minor.

[IMPACT]: Measurable. Hesitation observed prior to response.

A dark, rainy scene of a house. Rain is falling heavily, creating a sense of urgency and gloom. The house has a gabled roof with a gutter that is overflowing with water. The water is cascading down the side of the house, creating a rhythmic pattern of waterfalls. The house is made of wood siding, and there is a window visible on the right side. The overall atmosphere is one of a storm or a significant weather event.

● [RECORDING]

Outside, rainwater overflowed from a blocked gutter and struck the roof in steady rhythmic bursts.

Nobody mentioned it.

[ACTION]: Audio recorded automatically.
[SYSTEM NOTE]: It seemed important.
